Aberdeen Sterling Money Market Fund I Acc (ISIN GB00B1C42332) **Aberdeen Sterling Money Market Fund I Inc (ISIN GB00B1C42449)**

A sub-fund of Aberdeen Investment Funds ICVC. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.

Objectives and investment policy

Objective: To generate income and preserve the value of the shareholder's investment over the short term (income and capital preservation).

Investment policy: The Fund invests 80% or more of its total net assets in cash deposits and other similar investment types.

Derivatives: The Fund may use derivatives for efficient portfolio management, which includes reducing exposure to various investment risks (hedging).

Benchmark: The Fund is actively managed within its investment objective and policy, and is not limited by any benchmark.

This Fund is a standard:

- Variable Net Asset Value Fund.
- Money Market Fund

This Money Market Fund is:

- Not a guaranteed investment.
- Different from an investment in deposits, with particular reference to the risk that the principal invested in an MMF is capable of fluctuation.
- Does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the Net Asset Value per share.

The risk of loss of the principal is to be borne by the investor. The Fund may be suitable for investors comfortable with a relatively low level of risk, but less security than a deposit account with a bank. The Fund may deliver a lower return than a higher risk Fund. Your capital is not guaranteed.

If you invest in income shares, income from investments in the Fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: This Fund may be appropriate for investors with an investment time horizon of less than one year.

You can normally submit instructions to buy and sell shares in the Fund, between 9am and 5pm, on any day which is a working day in London. However, please see aberdeenstandard.com for details of any non-dealing days.

Further information about the Fund's investment objective and policy as well as the methods used by the fund to value its assets and calculate its net asset value can be found in the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- This Fund is ranked at 1 because funds of this type have experienced very low rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.
- A full list of risks applicable to this Fund can be found in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Baillie Gifford Japanese Fund - Class B Shares

Accumulation Shares - ISIN GB0006011133 (also representative of Income Shares ISIN GB0006010945)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to produce attractive capital growth over the long term.

Policy

- To invest in any economic sector in Japan.
- Investment will be mainly in shares of companies.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund's exposure to a single market and currency may increase share price movements.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
 - The result of the UK Referendum on membership of the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.

Baillie Gifford Strategic Bond Fund - Class B Shares

Income Shares - ISIN GB0005947741 (also representative of Accumulation Shares ISIN GB0005947857)

This Fund is a sub-fund of Baillie Gifford Bond Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund's aim is to produce monthly income. Potential capital growth is also sought, subject to prevailing market conditions.

Policy

- Investment will mainly be in investment grade and sub-investment grade bonds issued by companies worldwide and denominated in, or hedged back to, sterling.
- The Fund is actively managed through bond selection and strategic asset allocation.
- Derivatives, which are a type of financial contract, are used to protect or enhance the return of the Fund, including for investment purposes.

Other Information

- Bonds are a type of investment which can be issued by governments, companies and other organisations when they want to borrow money. The issuer of the bond owes the holder a debt. The issuer is obliged to pay interest and/or repay the debt at a later date.
- Sub-investment grade bonds typically mean the risk of non-payment is high.
- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.

 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - Bonds issued by companies and governments may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests may not be able to pay the bond income as promised or could fail to repay the capital amount.
 - The Fund's concentrated portfolio and long-term approach to investment may result in large movements in the share price.
 - Derivatives may be used to obtain, increase or reduce exposure to assets and may result in the Fund being leveraged. This may result in greater movements (down or up) in the price of shares in the Fund. It is not our intention that the use of derivatives will significantly alter the overall risk profile of the Fund.
 - In certain circumstances it can be difficult to buy or sell the Fund's holdings and even small purchases or sales can cause their prices to move significantly, affecting the value of the Fund and the price of shares in the Fund.
 - Market values for securities which are difficult to trade may not be readily available, and there can be no assurance that any value assigned to them will reflect the price the Fund might receive upon their sale.
 - The result of the UK Referendum on membership of the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.

Fidelity Extra Income Fund

a sub-fund of Fidelity Investment Funds

Y Accumulation Shares (ISIN: GB00BFRT3611)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- Aims to achieve a relatively high level of income.
- Obtains exposure primarily to a combination of UK corporate and government bonds and other fixed income and money market securities, preference shares and convertibles.
- Investments may be made in relation to bonds issued in currencies other than the fund's denominated currency. Exposure to currencies may be hedged, for example with currency forward contracts.
- Can invest in relation to bonds issued by governments, companies and other bodies.
- The fund may make use of derivatives which are consistent with achieving the fund's objective. This may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- The fund has discretion in its choices of investments within its objectives and policies.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults.

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. The ongoing charges figure is based on expenses for the year ending 28/02/2019. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 25/02/1999. This class was launched on 13/11/2013. Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an ^{1**} in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.

First State Global Listed Infrastructure Fund (Fund) Class B (Accumulation) GBP (Share Class)

ISIN GB00B24HJL45

a sub-fund of First State Investments ICVC (the Company)

First State investments (UK) Limited, the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to provide income and grow your investment.

Policy: The Fund invests in shares of companies that are involved in infrastructure around the world.

The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, and oil and gas storage and transportation.

The Fund does not invest directly in infrastructure assets.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

In addition to the charges set out in the charges section, the Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of

loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Single sector risk:** investing in a single sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund.
- **Listed Infrastructure Risk:** The Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	N/A

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	0.78%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	N/A
-----------------	-----

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charge is based on expenses for the year ending July 2018. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.

Past performance

Past performance is not a reliable guide to future performance. The past performance shown here includes fees, any reinvested income and tax.

The Fund launched on 08 October 2007.

The Share Class launched on 08 October 2007. The past performance of the Share Class is calculated in GBP.

Practical information

I Class Shares in Fundsmith Equity Fund

Accumulation Shares (ISIN: GB00B41YBW71)

Income Shares (ISIN: GB00B4MR8G82)

The fund is managed by Fundsmith LLP

Objectives and investment policy

The fund's objective is to achieve long-term growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in businesses:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive;

The fund will not invest in derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund does not track a particular benchmark.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

Recommendation: This fund invests for the long-term and may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. The fund is in Category 5 reflecting the risks inherent in the fund's investment portfolio, including that of capital losses. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

I Class Shares in Fundsmith Equity Fund

Charges

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2018. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 0.90% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

One-off charges taken before or after you invest

Entry charge	Not charged
Exit charge	Not charged

Charges taken from the fund over the year

Ongoing charges	0.95%

Past performance

This performance is calculated based on the net asset value per class (which includes all charges) and assuming the income has been re-invested in the fund.

Past performance is not necessarily a guide to future performance. The performance is shown in Pounds Sterling.

The fund was established in November 2010.

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Acc C
ISIN: GB00B80QG615

Objectives and Investment Policy

- To provide long term capital growth by matching the return of the S&P 500 Index.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index Provider.
- The strategy is to use a replication approach to track the S&P's 500 Index. This means that the fund will seek to invest in all of the companies that make up the index and in the same or very similar proportions in which they are included in the index.
- From time to time, the fund's investment composition may differ from the index in order to manage the fund's transaction costs, to maintain the fund's characteristics during different market environments and differing levels of asset availability or where there are investment restrictions due to regulations or the ACD's cluster munitions and controversial weapons policy.
- The Fund may invest in financial derivative instruments for efficient portfolio management with a level of risk that is consistent with the overall risk profile of the fund. In particular, exchange traded futures maybe used, with the aim of generating returns that are consistent with the index in respect of dividends and cash flowing into the fund.
- The Fund may hold cash and collective investment schemes, including collective investment schemes managed or operated by the ACD or an associate of the ACD, to manage day-to-day cash flow requirements.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2018. Charges may vary from year to year.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The investment benchmark for the Fund is the S&P 500 Gross.
- The Fund was launched on 31 October 1988.

JPM UK Higher Income Fund C - Net Accumulation a Share Class of JPM UK Higher Income Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B235RX72

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To provide income and prospects of capital growth by investing primarily in equity and equity-linked securities of UK companies. The Fund aims to provide a higher income yield than the yield on the FTSE™ All-Share Index.

Investment Policy: UK companies are companies that are incorporated under the laws of, and have their registered office in, the UK, or that derive the predominant part of their economic activity from the UK, even if listed elsewhere. Smaller companies may be held on an ancillary basis.

The Fund may also use Financial Derivative Instruments (derivatives) for the purpose of Efficient Portfolio Management, including hedging, where appropriate.

The Fund will invest predominantly in assets denominated in Sterling. However, assets may be denominated in other currencies and non-Sterling currency exposure will not normally be hedged back to Sterling.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Fund is FTSE All-Share Index (Net).

The benchmark is a point of reference against which the performance of the Fund may be measured. The Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmorgan.co.uk/kid-glossary.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The single market in which the Fund primarily invests, in this case the UK, may be subject to particular political and economic risks and, as a result, the Fund may be more volatile than more broadly diversified funds.
- ▶ As the portfolio of the Fund is primarily focused on generating income, it may bear little resemblance to the composition of its benchmark.
- ▶ This Fund charges the annual fee of the Authorised Corporate Director (ACD) against capital, which will increase the amount of income available for distribution to Shareholders, but may constrain capital growth. It may also have tax implications for certain investors.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

- ▶ The actual entry and exit charges paid may be less. Information on charges can be obtained from the investor's financial adviser.
- ▶ The Prospectus permits a fee to be charged for switching between Funds but this fee is currently waived by the Authorised Corporate Director.
- ▶ The ongoing charge is based on the last year's expenses to December 2018 and may vary from year to year.
- ▶ Charges are used to pay the costs of running this Share Class. These charges reduce the potential growth of the investment.
- ▶ Further information about charges can be found in "Part 5: Charges and Expenses" section of the Prospectus.

Past Performance

- ▶ Past performance is not a guide to future performance.
- ▶ Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in GBP.
- ▶ Fund launch date: 1959.
- ▶ Share Class launch date: 2012.

- 1 This performance was achieved under circumstances that may no longer apply.
- 2 The performance shown prior the launch date of this share class relates to the A share class. The A share class performance has not been amended or simulated to adjust for the lower ongoing fees of the C share class.

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

The Fund objective is to grow the money invested in the Fund over the long term.

The Fund will invest in the shares of companies listed on European Stock Exchanges.

The Fund Manager is able to make their own investment decisions, is not constrained by any geographical or sector limits and is not guided by any particular benchmark.

If you select I-Class Accumulation Units any income payable by the Fund will be automatically reinvested and reflected in the price of the units. If you select I-Class Income Units any income payable by the Fund will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- The Fund tends to invest in fewer companies and may be more volatile than a broadly diversified one.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General All Stocks Gilt Index Trust Class I Accumulation - ISIN: GB00B8344798

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a combination of income and growth (if the income is reinvested) by tracking the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index.
 - The Fund will invest in bonds (a type of loan which pays interest). The Fund's investments will closely match those that make up the Index. This Index consists of bonds which are issued by the UK Government (known as gilts).
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - 35% or more of the Fund can be invested in bonds issued by the UK Government.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking for income and growth from an investment in bonds issued by the UK government (known as gilts).
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.15%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2018. This figure may change in the future.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
- The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.1% higher than the minimum price at 31 December 2018.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in sterling (British pounds).
- The Fund will not replicate the performance of its benchmark index perfectly. This is because the Fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2012.
- The I class was launched on 20/12/12. Performance before this date is for M class, which has equivalent charges.

Legal & General Global Inflation Linked Bond Index Fund Class I Accumulation - ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Bloomberg Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index.
 - The Fund will invest predominantly in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way).
 - The Fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates.
 - The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - 35% or more of the Fund can be invested in United States government or public bonds.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
 - It will also use currency derivatives for investment purposes to manage the effect of fluctuations in exchange rates with sterling, in order to maintain accurate tracking.
 - The Fund may also invest in other bonds, deposits, money market instruments and cash.
- Other information:**
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking for income and growth from an investment in global inflation linked bonds excluding those issued by the UK government.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7

 - Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations
 - This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.18% higher than the selling price at 31 December 2018.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

LIONTRUST

SPECIAL SITUATIONS FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon Institutional class units (I Inc Class) (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- To provide long-term capital growth by investing in mainly UK equities using the Economic Advantage investment process.

Policy

- The Fund invests at least 80% in companies traded on the UK and Irish stock exchanges.
- The Fund is not restricted in choice of investment in terms of company size or sector.
- Income from the Fund's investments may either be paid to you or reinvested in the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 midday for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk/How to invest.

Investment process

- The Fund can invest in any companies in the UK and Ireland regardless of their size or sector, enabling the managers to find the best opportunities wherever they are across the UK stock market.
- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected. This surprises the market and can lead to strong share price appreciation.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are three classes of intangible assets: intellectual property, strong distribution channels and significant recurring business.
- The Fund measures the universe of Economic Advantage companies for the market's appreciation of their potential earnings growth. Under-appreciated companies have the strongest potential for share price growth.
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by main board directors. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.
- Further details may be found in the prospectus and information on the investment process may be found at www.liontrust.co.uk.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

M&G Emerging Markets Bond Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53

Managed by M&G Securities Limited, which is part of the Prudential Group

Objective and investment policy

The fund aims to provide income and capital growth.

Core investment: At least 70% of the fund is invested in bonds issued by the governments, government agencies or companies of emerging market nations*, which can be denominated in any currency.

Other investments: The fund also invests in currencies, focusing mainly on emerging market currencies and major currencies such as the US dollar and euro. It also holds cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by in-depth analysis of individual bond issuers. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global emerging markets.

* M&G has the discretion to decide which countries qualify as emerging markets. Typically, these will be countries that the International Monetary Fund or World Bank defines as emerging or developing economies.

Glossary terms

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

• The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

• Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

• Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

• The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

• The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

• In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

• The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry charge is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.79%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the year ending 30 June 2018. This figure may change from year to year. It excludes portfolio transaction costs.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
 - The past performance calculation excludes UK taxes from 01 January 2017. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
 - The Fund launched on 15 October 1999 and the Sterling Class I Accumulation share class launched on 19 April 2012.
 - Past performance is calculated using Sterling Class I Accumulation shares.
- △ 19 April 2012. The fund changed its objective. The past performance shown before this change was therefore achieved under circumstances that no longer apply. For more information about this change, visit www.mandg.co.uk/objectivechange

Practical information

The depositary is NatWest Trustee and Depositary Services Limited.

For more information about this fund, please visit www.mandg.co.uk/literature where you will find a copy of the Prospectus, Instrument of Incorporation and the latest annual or interim Investment Report and Financial Statements. M&G Global Macro Bond Fund

Sterling Class I – Accumulation shares ISIN no. GB00B78PGS53

Managed by M&G Securities Limited, which is part of the Prudential Group

Objective and investment policy

The fund aims to provide income and capital growth over five years or more.

Core investment: At least 70% of the fund is invested in bonds issued by companies and governments from anywhere in the world. The fund holds these assets directly and through derivatives.

Other investments: The fund can also invest in any currency, and cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund is a flexible global bond fund. The fund manager selects investments based on an assessment of macroeconomic factors such as economic growth, interest rates and inflation. This analysis determines which areas of the global bond markets the manager believes the fund should invest in to achieve its objective. It also influences the subsequent selection of individual bond holdings, as well as the fund's currency exposures. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global bond markets.

Glossary terms

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry charge is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.82%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the year ending 31 October 2018. This figure may change from year to year. It excludes portfolio transaction costs.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- The past performance calculation excludes UK taxes from 01 February 2017. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The Fund launched on 15 October 1999 and the Sterling Class I Accumulation share class launched on 16 December 2011.
- Sterling Class I - Accumulation shares do not have 10 complete years of past performance information available as they launched on 16 December 2011. Therefore, past performance information for Sterling Class X shares has been used for the period.

Merian North American Equity Fund U2 (GBP) Accumulation Shares (GB00BHBX8917)

A sub-fund of Merian Investment Funds Series II. Managed by Merian Investment Management Limited

OBJECTIVES AND INVESTMENT POLICY

Objective: long-term capital growth by investing primarily in shares (i.e. equities) and similar investments of companies listed or located in the US and Canada.

Policy: the Fund invests primarily in US and Canadian company shares and similar investments.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Portfolio construction is driven by systematic analysis of companies against several distinct characteristics including stock price valuation, balance sheet quality, growth characteristics, efficient use of capital,

analyst sentiment and supportive market trends to identify attractively priced investment opportunities.

The MSCI North America Index with net dividends re-invested is a point of reference against which the performance of the Fund may be measured. The Fund is managed having regard to the Index; however the Fund does not track the Index.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on any working day in London.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards ← Typically higher rewards

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Geographic concentration risk - a fall in the US and Canadian markets may have a significant impact on the value of the Fund because it primarily invests in these markets.

Currency risk - the Fund is denominated in British Pounds but holds assets denominated in other currencies. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the Fund uses derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

CHARGES

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
Charges taken from the Fund over a year	
Ongoing charge	0.80%
Charges taken from the Fund under specific conditions	
Performance fee	None

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.

The ongoing charges figure is based on the fixed ongoing charge as detailed in the prospectus. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking and may vary from year to year.

You can find out more details about the charges by looking at Schedule 1 of the prospectus.

PAST PERFORMANCE

Past performance is not a guide to future performance.

The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

The value of the class is calculated in British Pounds. The Index is in British Pounds.

The Fund launched on 6 April 1985. This class started to issue shares on 17 February 2014.

PRACTICAL INFORMATION

The Depositary is Citibank Europe plc, UK branch.

Merian North American Equity Fund is a sub-fund of Merian Investment Funds Series II (the "Company"). The assets and liabilities of each sub-fund are segregated from other sub-funds although it is not yet known whether a foreign court would give effect to segregated liability under a foreign law contract and so this is not certain in every circumstance.

Rathbone Income Fund I-Class

Fund Manager: Rathbone Unit Trust Management Limited
Accumulation units ISIN: GB00B3Q9WG18
Income units ISIN: GB00B7FQLQ43

Objectives and investment policy

The fund's objective is to seek sustainable above-average income, consistent with the preservation and growth of your investment over the long term.

Under normal circumstances, the fund invests mainly in shares from the UK, but may also invest in those from companies around the world.

The fund may also invest in other securities permitted by UCITS regulations. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual companies that can offer the best overall combination of price, risk, income and growth prospects.

Designed for: Investors who understand the fund risks, want an investment that focuses on income, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Shares: For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from portions of this fund).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

Currency risk: Changes in currency exchange rates could adversely affect fund performance.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 30 September 2018.

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.79% (Acc units); 0.79% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: bid to bid, net income reinvested.

Fund inception: 12 February 1971. I-Class units were launched 1st March 2012. Performance is based on the prices for R-Class units prior to that date.

Practical information

Trustee: NatWest Trustee and Depositary Services

Royal London Corporate Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B87FJ401

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The investment objective of the Fund is to maximise investment return through income but with some capital growth over the medium (5 years) to long (7 years) term.

Policy The Fund invests mainly in high quality sterling denominated bonds issued by companies. The Fund may use derivatives, but for efficient portfolio management purposes only.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The Fund is ranked in risk category 3 because its unit price has shown a low to medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.56%

Charges taken from the fund under specific conditions:

Performance fee none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charges figure is based on expenses for the year ending 31 October 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 29 March 1999 and the share class on 26 November 2012.

The Royal London Corporate Bond Fund (Accumulation - Class M Shares) in GBP

The Fund was initially launched as a unit trust but was converted to an open-ended investment company (OEIC) with effect from 30 April 2010.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Schroder Asian Income Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B5BJ7M17)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth and income over the long term by investing in equities of Asia Pacific companies excluding Japan but including Australia and New Zealand.

Investment Policy

The fund invests at least 80% of its assets in equities of Asia Pacific companies excluding Japan, but including Australia and New Zealand which offer dividend payments.

The fund may also invest in collective investment schemes and warrants, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

This unit class is managed with reference to the MSCI AC Pacific ex Japan (NDR). The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

China country risk: Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Performance fee: None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending September 2018 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past Performance

Schroder Recovery Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B3VVG600)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth by investing in equities of UK companies that have suffered a severe setback in either share price or profitability.

Investment Policy

The fund invests at least 80% of its assets in equities of UK companies.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the manager believes are significantly undervalued relative to their long-term earnings potential.

Recovery investments can be out of favour for many reasons, including weak short-term profitability, macro-economic concerns or an under strength balance sheet. These factors can significantly reduce the attractiveness of companies to short term investors and induce discounts to fair value. The Manager's recovery investment approach seeks to exploit this in a diversified manner.

The fund may also invest in collective investment schemes and warrants, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

This unit class is not managed with reference to a financial index.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down, which may adversely impact the performance of the fund.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Leverage risk: The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

NON-UCITS RETAIL SCHEME KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

THREADNEEDLE UK PROPERTY AUTHORISED INVESTMENT FUND (THE "COMPANY")

Class 2 Net Income Units (GBP) GB00BQ1YHW31, regulated by the FCA.

This Fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The aim of the Fund is to provide income and to grow the amount you invested.

The Fund is a Property Authorised Investment Fund ("PAIF") for tax purposes.

The Fund will typically invest at least two-thirds of its assets, either directly or indirectly, in commercial real estate in the United Kingdom which is used for business purposes. The Fund may also invest in shares, bonds, gilts, and other funds. The Fund may invest in other assets including cash to efficiently manage the Fund.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell units in the Fund on any day that is a business day in London. You can find more detail on the objective and investment policy of the Fund in the "Investment Objective, Policy and other Details of the Company" section of the Prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw within 5 years.

Risk and Reward Profile

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- It may be difficult or impossible to realise an investment in the Fund because the underlying property held within the Fund may not be readily saleable.
- The value of a property is a matter of a valuer's opinion and the true value may not be recognised until the property is sold by the Fund.
- As the Fund is dual priced, there is a price to buy units and a lower price to sell them. The difference between the two is known as the 'spread'. This Fund's spread reflects the transaction costs of buying and selling commercial property, and other assets. The spread can change at any time and by any amount. As an example, the buying price for shares in this Fund was approximately 6.5% higher than the selling price on 1st April 2019.
- If values in the property market go down or rental income decreases, the Fund's value may be negatively affected.
- Due to the illiquid nature of property and the time it can take to buy or sell assets, under normal circumstances up to 20% of the assets of the Fund into which the Fund invests may be held as cash deposits. In exceptional circumstances, the level of cash held by the Fund may be significantly higher. Holding high levels of cash will have an impact on the performance of the Fund and its distributable income until the excess cash is invested in property assets.
- Shares of the Fund may exhibit significant price volatility.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.
