This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aberdeen Ethical World Equity Fund I Acc (ISIN GB0006833932) **Aberdeen Ethical World Equity Fund I Inc (ISIN GB0006833825)**

A sub-fund of Aberdeen Investment Funds ICVC. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.

Objectives and investment policy

Objective: To increase the value of the shareholder's investment over the long term (capital growth).

Investment policy: The Fund invests 80% or more of its total net assets in worldwide equities. The Manager will choose investments based on thorough Fundamental company analysis including ethical and socially responsible criteria. These criteria include the environment, employee relations, product quality and international operations.

The Fund's equity investments can include all types of equities and equity related securities.

Derivatives: The Fund may use derivatives for efficient portfolio management, which includes reducing exposure to various investment risks (hedging).

Benchmark: The Fund is actively managed within its investment objective and policy, and is not limited by any benchmark.

If you invest in income shares, income from investments in the Fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can normally submit instructions to buy and sell shares in the Fund, between 9am and 5pm, on any day which is a working day in London. However, please see aberdeenstandard.com for details of any non-dealing days.

Further information about the Fund can be found in the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested. The indicator does not take into account the following risk of investing in this Fund:
 - Exchange Rates: The Fund may have holdings which are denominated in different currencies and may be affected by movements in exchange rates. Consequently, the value of the Fund's investments and the income from them may rise or fall in line with exchange rates.
 - A full list of risks applicable to this Fund can be found in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BMO Responsible Global Equity Fund

Share Class: 2 Acc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033145045)
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide long-term capital growth.

The Manager seeks to achieve this by investing mainly in global equities (ordinary shares in companies from anywhere in the world). The Manager invests only in assets which meet the Fund's ethical screening criteria. The ethical screening applied to the Fund means that a number of the largest companies are screened out on ethical grounds.

While the Manager will invest mainly in equities, it may also invest in other investments such as derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities or currencies other than the Fund's accounting currency, which is sterling. The Fund does not normally hedge currency exposure.

Investment is concentrated in companies in any market whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance, do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regard to the environment or human rights).

Any income earned by this share class will be reinvested back into the share class to help boost the value of the share.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.

Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

BMO Responsible UK Equity Fund

Share Class: 2 Acc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033396481).
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide capital growth with some income.

The Manager seeks to achieve this by investing mainly in UK equities (ordinary shares in companies listed on the UK stock market).

The Manager invests only in assets which meet the Fund's ethical screening criteria.

The ethical screening applied to the Fund means that a number of the UK's largest companies (those that form part of the FTSE 100 Index) are screened out on ethical grounds. As a result, the Fund will usually include significant exposure to medium and smaller companies.

While the Manager will invest mainly in equities, it may also invest in other investments such as derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities.

Investment is concentrated in companies whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance, do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regards to the environment or human rights).

Any income earned by this share class will be reinvested back into the share class to help boost the value of a share.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

KEY INVESTOR INFORMATION

AMITY INTERNATIONAL FUND

SHARE CLASS B GB0008449075

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This fund is a sub-fund of EdenTree Investment Funds, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to achieve long-term capital growth with a reasonable level of income through a diversified portfolio of international companies.

The Amity International Fund seeks to invest in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement in alcohol, tobacco and weapon production, gambling and publication of violent or explicit materials.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

Any income on the Fund will be paid out to you or you may choose to have it reinvested by purchasing additional shares.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 5 as its price has experienced significant rises and falls historically.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- When investing in assets which are in currencies other than Sterling, exchange rate fluctuations can have a positive or negative impact on the value of your investment.
- Where Funds invest in some overseas markets, these investments may carry risks associated with failed or delayed settlement of market transactions and with the registration and custody of securities. Investment in emerging markets may involve a higher than average risk.

More details on all of the risks mentioned above can be found in the full Prospectus.

CHARGES FOR THIS FUND

The charges you pay are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 2%

GLOBAL SUSTAINABLE EQUITY FUND

Class I Acc ISIN: GB00B71DPP64

A sub-fund of Janus Henderson Sustainable/Responsible Funds, an OEIC managed by Henderson Investment Funds Limited.

Objectives and investment policy

Objective

The Fund aims to achieve capital growth by investing primarily in a portfolio of global equities.

Investment policy

The Fund invests in:

- Shares of companies in any industry and country that the investment manager considers to be contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy.

In choosing investments, the investment manager uses overall market and economic research to identify the most promising industries and focuses on companies with strong management, attractive valuations and good growth potential.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

Fund currency GBP **Share class currency** GBP

Terms to understand

Bonds Securities that represent an obligation to repay a debt along with interest.

Shares / Equities Securities that represent fractional ownership in a company.

Volatility How sharply the Fund's share price has gone up and down over a period, generally several years.

Derivatives Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

You can buy, sell or switch shares in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.

The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Sustainable Investment The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

KAMES
CAPITAL

Kames Ethical Corporate Bond Fund

a sub-fund of Kames Capital ICVC

Sterling Class B - Accumulation shares (ISIN: GB00B018K352)

This fund is managed by Kames Capital plc.

Objectives and investment policy

Objective: to provide a combination of capital growth and income.

Policy: all investments will meet the Fund's ethical criteria. This means the Fund avoids investing in companies that it decides harm people, society, animals or the environment. Further details of the ethical criteria are set out in the Prospectus at Appendix D.

The Fund invests predominantly in sterling denominated investment grade (lower risk) bonds issued by companies or organisations.

Up to 10% of the Fund may be invested in high yield (higher risk) bonds.

The Fund may use derivatives (financial contracts whose value is linked to an underlying asset) to manage risks and costs.

Within its ethical criteria and the limits set out above, the Fund is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards			Higher risk / potentially higher rewards			

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because bond prices can be affected by political or economic events, changes in exchange rates, and changes in interest rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

Liquidity: The Fund's value may fall if bonds become more difficult to trade or value due to market conditions or a lack of supply and demand. This risk increases where the Fund invests in high yield bonds.

Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall. Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.54%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2018. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Switches or Conversion: 1st 4 in any calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Prospectus.

Past performance

Past performance is not a guide to future performance.

Fund launch date: 28 April 2000

Share class launch date: 03 June 2004

Performance is calculated in GBP.

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.

LIONTRUST

SUSTAINABLE FUTURE CORPORATE BOND FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Corporate Bond Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon Retail class units (6 Acc Class) (ISIN: GB00B8BPH312). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- To provide a higher long-term return than UK Government bonds. Although there is some potential for the capital value of the Fund to grow, over the long term (five years or more) most of the returns are likely to be in the form of income.

Policy

- The Fund holds investment grade sterling corporate bonds, government bonds, and non-sterling investment grade corporate bonds. Relevant mainstream fixed income derivative instruments are held for the purpose of reducing risk.
- The Fund will predominately invest in investment grade bonds (over 80%), although is also permitted to invest up to 20% in sub-investment grade rated bonds that may offer a higher income but at greater risk to their capital value.
- The Fund will focus on issuers that demonstrate high levels of ESG and/or that will benefit from the shift towards a more sustainable economic system.
- Consistent with the Investment Association's Sterling Corporate Bond sector rules, 80% of the bonds in the Fund will be priced in sterling, or hedged back into sterling (hedging is a technique to negate the impact of any adverse exchange rate movements).
- The Fund is permitted to have a maximum aggregated unhedged currency exposure of 5%.
- The Fund may use derivatives to protect against market or currency movements, to reduce costs, or for investment purposes. The use of derivatives is subject to Liontrust's derivative policy.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 midday for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk/How to invest.

Investment process

- Macroeconomic analysis is used to determine our top-down view of the world and this helps shape all aspects of our portfolio construction and appetite for risk.
- After this, we aim to focus on high-quality issuers and believe this can enable us to reduce bond-specific risk. Our assessment of quality is a distinctive part of our process, whereby we combine traditional credit analysis with a detailed sustainability assessment based upon our proprietary model that focuses on ESG that may impact upon the issuer.
- The fund managers assess individual bonds for whether they believe the bonds offer attractive long-term returns and for absolute and relative valuations. Simply put, there is no point in investing in a bond merely because it is cheap relative to others in the sector if we believe the total returns are not attractive to the end investor.
- Rather than focusing on lower credit quality issuers, we seek the best value bonds issued by the high quality issuers that we have identified, looking at bonds issued across the capital structure, along the maturity curve, or issued into the primary credit markets (UK, US and Europe).
- We believe this approach is consistent with our principal aim of delivering attractive long-term returns to our clients.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 3 because funds of this type have experienced average rises and falls in value in the past.
- Fluctuations in interest rates are likely to affect the value of the bonds and other fixed-interest securities held by the Fund. If long-term interest rates rise, the value of your shares is likely to fall.
- The Fund can invest in derivatives. Derivatives are used to protect against currencies, credit and interest rates move or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The value of these securities will fall if the issuer is unable to repay their debt or has their credit rating reduced. Generally, the higher perceived credit risk of the issuer, the higher the rate of interest.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None

Past performance

- Past performance is not a guide to future performance.
- Past performance has been calculated on the basis that any distributable income of the Fund has been reinvested.
- The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launched on 19 February 2001.
- The base currency of the Fund is pounds sterling.
- The 6 Acc share class was launched on 01 February 2013.

LIONTRUST

SUSTAINABLE FUTURE EUROPEAN GROWTH FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future European Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon Retail class units (2 Acc Class) (ISIN: GB0030029390). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- To produce long-term capital growth (over five years or more) by investing in a broad range of European companies.

Policy

- Typically at least 80% of the Fund will be invested in the shares of European companies.
- Investments in the European bond market may also be made from time to time.
- The Fund will only invest in companies that meet defined ethical considerations and will benefit from improvements in environmental standards and a shift towards a more sustainable economic system.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 midday for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk/How to invest.

Investment process

- In a fast-changing world, we believe the companies that will thrive are those which a) improve people's quality of life, be it through medical, technological or educational advances, b) drive improvements in the efficiency with which we use increasingly scarce resources and c) help to build a more stable, resilient and prosperous economy.
- The process seeks to invest in high-quality organisations with robust business fundamentals, strong management and attractive valuations.
- Our assessment of quality is a distinctive part of our process. For us, high-quality companies must exhibit the following three characteristics: excellent management and core products or services that are making a positive contribution to society, strong growth prospects, and the ability to translate these into leading returns on equity.
- For each company, we determine the key environmental, social and governance (ESG) factors that are important indicators of future success, and assess how well these are managed. We do this through our proprietary sustainability matrix.
- We also seek strong and dependable growth prospects due to alignment with our themes. Our research has identified 20 areas of long-term growth within economies. These are our themes and we believe companies exposed to these are likely to see stronger and more persistent performance than those that are not.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily due to its exposure to European (ex UK) equities.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 because funds of this type have experienced medium to high rises and falls in value in the past.
- The Fund can invest in derivatives. Derivatives are used to protect against currencies, credit and interest rates move or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.

Rathbone Ethical Bond Fund (I-Class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

The fund's objective is to seek regular, above-average income.

Under normal circumstances, the fund invests mainly in bonds and bond market instruments that meet strict ethical and financial criteria.

The fund may also invest in other securities permitted by UCITS regulations. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual bonds that can offer the best overall combination of price, risk, income and also meet established ethical standards.

Designed for: Investors who understand the fund risks, want an investment that focuses on income, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Terms to understand

Bonds: Securities that represent an obligation to repay a debt, along with interest.

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

Currency risk: Changes in currency exchange rates could adversely affect fund performance.

Default risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 30 September 2018.

One-off charges taken before or after you invest:

Entry charge none

Exit charge none

Charges taken from the fund over a year:

Ongoing charges 0.67% (Acc units); 0.67% (Inc units)

Charges taken from the fund under specific conditions:

Performance fee none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: bid to bid, net income reinvested.

Fund inception: 14 May 2002. I-Class units were launched 1st March 2012. Performance is based on the prices for R-Class units prior to that date.

Practical information

Trustee: NatWest Trustee and Depositary Services

Royal London Cash Plus Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1H58

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The investment objective of the Fund is to produce an attractive level of capital growth and income.

Policy The Fund invests in cash, deposits, money market instruments and government bonds with shorter maturities. The Fund may use derivatives, but for efficient portfolio management purposes only. Where relevant, investments will be screened to ensure they meet the Fund's predefined ethical criteria.

Recommendation Investors who seek income or a short-term investment option.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Money market instruments Investments that pay interest, have a short duration and are designed to maintain a stable value.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The Fund is ranked in risk category 2 because its unit price has shown a low level of volatility historically. The SRR1 was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, money market instruments are typically less volatile than bonds and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Counterparty Risk Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.15%

Charges taken from the fund under specific conditions:

Performance fee none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charges figure is based on expenses for the year ending 31 October 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Past performance

The graph shows fund performance over the past 5 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 22 June 2011 and the share class on 12 June 2014.

The Royal London Cash Plus Fund
(Accumulation - Class Y Shares) in GBP

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Royal London Sustainable Leaders Trust (Accumulation - Class C Shares)

ISIN: GB00B7V23Z99

This Fund is managed by RLUM Limited

Objectives and investment policy

Objective The Fund aims to provide growth in the value of your investment over time, by investing predominantly in the shares of UK companies

Policy The investments picked for this Fund are screened in accordance with the Manager's ethical and sustainable investment policy. This policy applies an ethical screen to exclude companies that conflict with specific ethical concerns (e.g. the sale of weapons or tobacco) and a sustainable screen then applies positive criteria, seeking out companies that aim to mitigate environmental and social challenges and improve quality of life. This means the Fund will not invest in all areas of the market. Further details of this policy can be found in the Fund's Prospectus. At least 80% of the Fund's investments are in the shares of UK companies. Up to 20% of the Fund can be invested in shares in overseas companies.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

UK companies Companies which are established in the UK or which carry out a significant part of their activities in the UK

Overseas companies Companies which are established outside of the UK or which carry out a significant part of their business activities outside of the UK.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The Fund is shown in risk category 5 because its unit price has shown a medium to high level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by governments are typically less volatile than bonds issued by corporations. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

This Fund has historically been primarily invested in shares. The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically. A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category. The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe. The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk: Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Exchange Rate Risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk: In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For full details of the Fund's risks, please see the prospectus which may be obtained from (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Standard Life Investments Ethical Corporate Bond Fund, a Sterling denominated sub fund of the Standard Life Investment Company II, Platform 1 Accumulation Shares (ISIN:GB00B708KW45). This fund is managed by Aberdeen Standard Fund Managers Limited.

Objectives and Investment Policy

The fund aims to provide a level of income, before charges, above that available on UK Government bonds by investing predominantly in investment grade bonds.

The fund is actively managed by our investment teams who may invest in a wide range of bonds (e.g. corporate bonds including sub investment grade bonds, overseas bonds, index-linked bonds, floating rate notes (FRNs) and asset backed securities (ABSs) and/or money market instruments) in order to take advantage of opportunities they have identified and which meet our strict ethical criteria. These criteria are agreed with the Standard Life Ethical Funds Advisory Group and may be amended from time to time if considered appropriate. The fund manager will exclude companies which fail to meet the ethical criteria whilst seeking to include companies whose business activities are regarded as making a positive contribution to society.

The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example interest income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {4} because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by

the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund makes routine use of derivatives.

- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Standard Life Investments European Ethical Equity Fund, a Sterling denominated sub fund of the Standard Life Investment Company II, Platform 1 Accumulation Shares (ISIN:GB00B3N24788). This fund is managed by Aberdeen Standard Fund Managers Limited.

Objectives and Investment Policy

The fund aims to provide long term growth by investing in a diversified portfolio of European, excluding UK, equity assets that meet our strict ethical criteria.

These criteria are agreed with the Standard Life Ethical Funds Advisory Group and may be amended from time to time if considered appropriate. The fund manager will exclude companies which fail to meet the ethical criteria whilst seeking to include companies whose business activities are regarded as making a positive contribution to society.

The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management).

Derivatives will only be used for hedging or to provide exposures that could be achieved through investment in the assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example dividend income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {5} because of the extent to which the following risk factors apply:

- The fund invests in equities and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund may invest in equities and equity related securities in European emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure

amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund does not make extensive use of derivatives.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.
