ASI Sterling Money Market Fund I Acc (ISIN GB00B1C42332) A sub-fund of Aberdeen Standard OEIC I. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The fund aims to generate income and preserve some capital over the short term (2 years or less) by investing in cash deposits and money market instruments.

Performance Target: The fund targets a return equivalent to 1 Month GBP LIBID. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target 1 Month GBP LIBID, has been chosen as a proxy for the return from cash deposits.

Investment Policy

Portfolio Securities

- The fund invests at least 80% in cash deposits and money market instruments.
- The fund may also invest in reverse repos, securitisations and asset-backed commercial paper.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments).
- The fund qualifies as a Money Market Fund under the MMF Regulation and more specifically as a Standard VNAV MMF.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
- The fund is managed in line with the MMF Regulation which is used as a reference for portfolio management and risk monitoring of the fund. For example, constraints include limits on the average maturity of the portfolio.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 1 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/ or generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in investments.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within two years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.15%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The Ongoing Charges figure is an estimate based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund. An estimate is used in order to provide the figure that will most likely be charged.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/18.

Further information on the charges can be found in the Prospectus.

FRAMLINGTON EQUITIES

AXA Framlington Health Fund

Unit class : AXA Framlington Health Fund Z Accumulation GBP (ISIN: GB00B6WZJX05)
This Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of this Fund is to provide long-term capital growth.

Investment Policy

The Fund invests in shares of listed healthcare companies including producers of pharmaceuticals, biotechnology firms, medical device and instrument manufacturers, distributors of healthcare products, care providers and managers and other healthcare services companies, which the fund manager believes will provide above-average returns. The Fund invests in companies of any size which can be based anywhere in the world albeit the Fund tends to be biased towards the US, as this is where the majority of healthcare related companies are based. The fund manager selects shares based upon analysis of a company's financial status, quality of its management, expected profitability and prospects for growth.

The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the MSCI World Healthcare index. The MSCI World Healthcare index is designed to measure the performance of large and mid-cap segments across 23 developed markets. This index best represents the types of companies in which the Fund predominantly invests.

This Fund is actively managed in reference to the MSCI World Healthcare index, which may be used by investors to compare the Fund's performance.

Income

Income from investments in the Fund will be rolled up into the value of your unit if you hold accumulation units.

Fund Currency

The reference currency of the Fund is Sterling.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

Processing of subscription and redemption orders

Your orders to buy, sell or transfer units in the Fund must be received by the Administrator by 12 noon on any working day, to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risks

Single Sector Risk: as this Fund is invested in a single sector, the Fund's value will be more closely aligned with the performance of that sector and it may be subject to greater fluctuations in value than more diversified funds.

Currency Risk: the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Baillie Gifford Japanese Fund - Class B Shares

Accumulation Shares - ISIN GB0006011133 (also representative of Income Shares ISIN GB0006010945)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in Sterling, by at least 1.5% per annum over rolling 5 year periods.

Policy

- The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector.
- Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund's exposure to a single market and currency may increase share price movements.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
 - The result of the UK Referendum on membership of the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Accumulation shares and is at 30/04/2019.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

Emerging Markets Fund

a sub-fund of Fidelity Institutional Funds

W Accumulation Shares (ISIN: GB00B9SMK778)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more.
- The fund will invest at least 70% in companies in countries experiencing higher levels of economic growth within Africa, the Indian sub-continent, Latin America, East and South East Asia, Central and Eastern Europe (including Russia) and the Middle East. This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion.
- Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The companies will be either listed, incorporated, domiciled, or have significant business activities in the region.
- The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index.
- The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.
- In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

Fidelity Extra Income Fund

a sub-fund of Fidelity Investment Funds

Y Accumulation Shares (ISIN: GB00BFRT3611)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund's main aim is to pay you an income. The fund also has the potential to increase the value of your investment.
- The fund will be at least 70% exposed to sterling denominated (or hedged back to sterling) investment grade debt instruments (e.g. bonds with a rating of BBB-/Baa or higher from an internationally recognised rating agency).
- Investments may be made in relation to debt instruments issued in currencies other than sterling. Hedging back to sterling aims to reduce the risk of exposure to other currencies.
- The remainder will be invested in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund may also use derivatives with the aim of achieving the investment objective.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider a custom blend of indices*.
- The Investment Manager has a wide degree of freedom relative to the index and may invest in issuers, sectors, countries and security types not included in the index in order to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.
- *Please refer to the Investment Policy set out for the fund in the Prospectus for details on the blended index.
- On 21 November 2019 the name of this Y share class will change to W share class.

Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults.

Charges for this fund (ISIN: GB00BFRT3611)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 0.77%

Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. The ongoing charges figure is based on expenses for the year ending 28/02/2019. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 25/02/1999. This class was launched on 13/11/2013. Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.

First State Global Listed Infrastructure Fund (Fund) Class B (Accumulation) GBP (Share Class)

ISIN GB00B24HJL45

a sub-fund of First State Investments ICVC (the Company)

First State investments (UK) Limited, the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to provide income and grow your investment.

Policy: The Fund invests in shares of companies that are involved in infrastructure around the world.

The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, and oil and gas storage and transportation.

The Fund does not invest directly in infrastructure assets.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed meaning that the manager uses expertise to pick investments rather than tracking a benchmark.

The Fund's performance is compared against the value of the FTSE Global Core Infrastructure 50/50 Index and the Fund is included in the Investment Association's Global Sector.

Investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

In addition to the charges set out in the charges section, the Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its

investments. Shares with a rating of 5 might have higher risks, but also higher returns.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Single sector risk:** investing in a single sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund.
- **Listed Infrastructure Risk:** The Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 4.00%

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charge is based on expenses for the year ending July 2018. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.

Past performance

Past performance is not a reliable guide to future performance. The past performance shown here includes fees, any reinvested income and tax.

I Class Shares in Fundsmith Equity Fund

Accumulation Shares (ISIN: GB00B41YBW71)

Income Shares (ISIN: GB00B4MR8G82)

The fund is managed by Fundsmith LLP

Objectives and investment policy

The fund's objective is to achieve long-term growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in businesses:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive;

The fund will not invest in derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund does not track a particular benchmark.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

Recommendation: This fund invests for the long-term and may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. The fund is in Category 5 reflecting the risks inherent in the fund's investment portfolio, including that of capital losses. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

Charges

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2018. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 0.90% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

One-off charges taken before or after you invest

Entry charge	Not charged
Exit charge	Not charged

Charges taken from the fund over the year

Ongoing charges	0.95%

Past performance

This performance is calculated based on the net asset value per class (which includes all charges) and assuming the income has been re-invested in the fund.

Past performance is not necessarily a guide to future performance. The performance is shown in Pounds Sterling.

The fund was established in November 2010.

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** over the long term, which is a period of 5 years or more, by tracking the performance of the S&P 500 Index (the "Index").
 - The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
 - The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
 - However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
 - The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
 - The anticipated **tracking error** for the Fund is expected to be up to 0.20%.
- Use of derivatives**
- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
 - Income is reinvested.
 - You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
 - Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2018. Charges may vary from year to year.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the S&P 500 Gross.
- The Fund was launched on 31 October 1988.

Jupiter Absolute Return Fund I-Class

I-Class Accumulation Units, ISIN: GB00B6Q84T67.
The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

The Fund objective is to provide a positive absolute return, net of fees, higher than 3-month £ LIBOR, or a future replacement index* independent of market conditions over a 3-year rolling period.

Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be achieved over the 3-year rolling periods or in respect of any other time period.

*LIBOR will be replaced by SONIA in 2021.

The Fund can invest in a wide range of assets to achieve its investment objective, including shares of companies, fixed interest securities and entering into derivative transactions for investment purposes.

The fund manager uses a combination of quantitative screening and fundamental analysis for security selection. Generally, for short positions, the fund manager looks for overvalued stocks where there is a specific catalyst that could lead to a de-rating of a company. For long positions, whilst the Fund is not constrained and may vary over time, it is likely to favour companies which are considered to be undervalued. The fund manager seeks to maintain a diverse portfolio of investments.

Target benchmark - 3-month GBP LIBOR

The 3-month £ LIBOR rate is an industry standard index and is one of the leading representations of the UK Cash Deposit Markets. It is easily accessible and provides a fair reflection of the fund manager's investment universe and a good relative measure to assess performance outcomes.

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by a benchmark in their portfolio positioning.

Any income payable by the Fund will be automatically reinvested and reflected in the price of units.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund uses derivatives for investment purposes which under certain market conditions may cause the Fund to significantly fall in value. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the Fund.

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- The Fund tends to invest in fewer companies and may be more volatile than a broadly diversified one.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

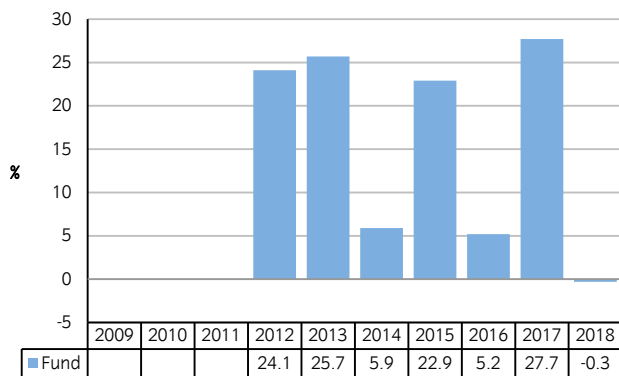

Ongoing charges	1.02%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure quoted in this document is based on fees and expenses for the year to 30/06/2018.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General All Stocks Gilt Index Trust Class C Accumulation - ISIN: GB00BG0QNW27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a combination of income and growth (if the income is reinvested) by tracking the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index.
 - The Fund will invest in bonds (a type of loan which pays interest). The Fund's investments will closely match those that make up the Index. This Index consists of bonds which are issued by the UK Government (known as gilts).
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - 35% or more of the Fund can be invested in bonds issued by the UK Government.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking for income and growth from an investment in bonds issued by the UK government (known as gilts).
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

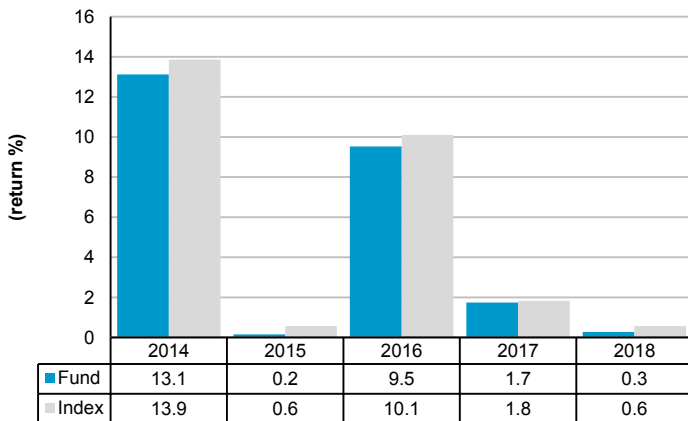

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.10%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2018. This figure may change in the future.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
- The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.1% higher than the minimum price at 31 December 2018.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in sterling (British pounds).
- The Fund will not replicate the performance of its benchmark index perfectly. This is because the Fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2013.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Global Services SE, UK Branch.

Legal & General Global Inflation Linked Bond Index Fund Class I Accumulation - ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Bloomberg Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index.
 - The Fund will invest predominantly in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way).
 - The Fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates.
 - The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - 35% or more of the Fund can be invested in United States government or public bonds.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
 - It will also use currency derivatives for investment purposes to manage the effect of fluctuations in exchange rates with sterling, in order to maintain accurate tracking.
 - The Fund may also invest in other bonds, deposits, money market instruments and cash.
- Other information:**
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking for income and growth from an investment in global inflation linked bonds excluding those issued by the UK government.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.

 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
 - Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations
 - This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.18% higher than the selling price at 31 December 2018.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

LIONTRUST

SPECIAL SITUATIONS FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon Institutional class units (I Inc Class) (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- To provide long-term capital growth by investing in mainly UK equities using the Economic Advantage investment process.

Policy

- The Fund invests at least 80% in companies traded on the UK and Irish stock exchanges.
- The Fund is not restricted in choice of investment in terms of company size or sector.
- Income from the Fund's investments may either be paid to you or reinvested in the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 midday for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk/How to invest.

Investment process

- The Fund can invest in any companies in the UK and Ireland regardless of their size or sector, enabling the managers to find the best opportunities wherever they are across the UK stock market.
- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected. This surprises the market and can lead to strong share price appreciation.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are three classes of intangible assets: intellectual property, strong distribution channels and significant recurring business.
- The Fund measures the universe of Economic Advantage companies for the market's appreciation of their potential earnings growth. Under-appreciated companies have the strongest potential for share price growth.
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by main board directors. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.
- Further details may be found in the prospectus and information on the investment process may be found at www.liontrust.co.uk.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

M&G Emerging Markets Bond Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide income and capital growth.

Core investment: At least 70% of the fund is invested in bonds issued by the governments, government agencies or companies of emerging market nations*, which can be denominated in any currency.

Other investments: The fund also invests in currencies, focusing mainly on emerging market currencies and major currencies such as the US dollar and euro. It also holds cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by in-depth analysis of individual bond issuers. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global emerging markets.

* M&G has the discretion to decide which countries qualify as emerging markets. Typically, these will be countries that the International Monetary Fund or World Bank defines as emerging or developing economies.

Benchmark: 1/3 JPM EMBI Global Diversified Index

1/3 JPM CEMBI Broad Diversified Index

1/3 JPM GBI-EM Global Diversified Index

The fund manager makes active investment decisions for the fund. The benchmark is a comparator which can be used to measure the fund's performance.

For unhedged share classes, the benchmark is shown in the share class currency.

Glossary terms

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

• The risk number shown is not guaranteed and may change over time.

• The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

• The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

• Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

• Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

• The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

• The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

• In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

• The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.75%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1 August 2019.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.75%. The fund's annual report for each financial year will include details on the exact charges made.

M&G Global Macro Bond Fund

Sterling Class I – Accumulation shares ISIN no. GB00B78PGS53

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide income and capital growth over five years or more.

Core investment: At least 70% of the fund is invested in bonds issued by companies and governments from anywhere in the world. The fund holds these assets directly and through derivatives.

Other investments: The fund can also invest in any currency, and cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund is a flexible global bond fund. The fund manager selects investments based on an assessment of macroeconomic factors such as economic growth, interest rates and inflation. This analysis determines which areas of the global bond markets the manager believes the fund should invest in to achieve its objective. It also influences the subsequent selection of individual bond holdings, as well as the fund's currency exposures. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global bond markets.

Benchmark: IA Global Bonds sector

The fund manager makes active investment decisions for the fund. The benchmark is a comparator which can be used to measure the fund's performance.

For unhedged share classes, the benchmark is shown in the share class currency.

Glossary terms

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

• The risk number shown is not guaranteed and may change over time.

• The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

• The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

• Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

• High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

• The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

• The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

• Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

• In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

• The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

KEY INVESTOR INFORMATION

Merian UK Mid Cap Fund U2 (GBP) Accumulation Shares (GB00BHBX8N56)

A sub-fund of Merian Investment Funds Series I. Managed by Merian Investment Management Limited

OBJECTIVES AND INVESTMENT POLICY

Objective: to achieve capital growth. In seeking to achieve its investment objective the fund will aim to deliver a return, net of fees, greater than that of the FTSE 250 ex Investment Trust Index over rolling 3 year periods.

Policy: the Fund invests primarily in UK company shares and similar investments. The Fund will typically invest at least 75% in medium sized UK companies. Medium sized companies are defined as those which have a market capitalisation consistent with the FTSE 250 Index. The Fund may invest up to 10% in unlisted companies.

The Fund will typically invest in the shares of fewer than 60 companies. The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Portfolio construction is driven by research into a company's future prospects in the context of the economic environment to identify attractively priced investment opportunities.

The FTSE 250 ex Investment Trust Index is a broad representation of the Fund's investment universe and as such is a point of reference against which the performance of the Fund may be measured.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on any working day in London.

RISK AND REWARD PROFILE

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the Fund because it primarily invests in this market.

Concentration risk (number of investments) - the Fund may at times hold a smaller number of investments, and therefore a fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.

Liquidity risk - some investments including those in unlisted companies may be hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.

Currency risk - the Fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

CHARGES

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
Charges taken from the Fund over a year	
Ongoing charge	0.70%
Charges taken from the Fund under specific conditions	
Performance fee	None

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.

The ongoing charges figure is based on the fixed ongoing charge as detailed in the prospectus. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking and may vary from year to year.

You can find out more details about the charges by looking at Schedule 1 of the prospectus.

PAST PERFORMANCE

Past performance is not a guide to future performance.

The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

The value of the class is calculated in British Pounds. The Index is in British Pounds.

The Fund launched on 22 February 2002. This class started to issue shares on 17 February 2014.

PRACTICAL INFORMATION

The Depositary is Citibank Europe plc, UK branch.

Merian UK Mid Cap Fund is a sub-fund of Merian Investment Funds Series I (the "Company"). The assets and liabilities of each sub-fund are segregated from other sub-funds although it is not yet known whether a foreign court would give effect to segregated liability under a foreign law contract and so this is not certain in every circumstance.

Further information about the Company, copies of its prospectus, annual and half-yearly reports may be obtained, for the entire Company, free of charge in English from the registrar, FNZ TA Services Ltd, PO Box 1398, Sunderland, SR5 9QN or visit www.merian.com.

Details of Merian Investment Management Limited's remuneration policy which includes a description of how remuneration and benefits are calculated, the identities of the persons responsible for awarding remuneration and benefits and details of the remuneration committee, are available at www.merian.com. A paper copy will be made available free of charge upon request to Merian Investment Management Limited.

The latest share prices are available from the registrar during normal business hours and will be published daily at www.merian.com.

You may switch your shares to the shares of another sub-fund of the Company free of charge. For further details see the "Switching" section of the prospectus.

This Fund is subject to tax laws and regulations of the United Kingdom. Depending on your home country of residence, this might have an impact on your personal tax position. For further details, please speak to your financial adviser.

Rathbone Income Fund I-Class

Fund Manager: Rathbone Unit Trust Management Limited
Accumulation units ISIN: GB00B3Q9WG18
Income units ISIN: GB00B7FQLQ43

Objectives and investment policy

The fund's objective is to seek sustainable above-average income, consistent with the preservation and growth of your investment over the long term.

Under normal circumstances, the fund invests mainly in shares from the UK, but may also invest in those from companies around the world.

The fund may also invest in other securities permitted by UCITS regulations. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual companies that can offer the best overall combination of price, risk, income and growth prospects.

Designed for: Investors who understand the fund risks, want an investment that focuses on income, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Shares: For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from portions of this fund).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

Currency risk: Changes in currency exchange rates could adversely affect fund performance.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 30 September 2018.

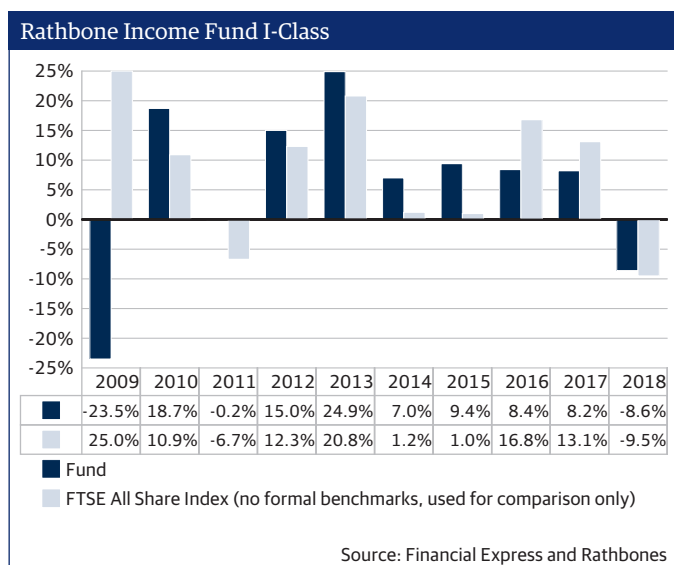

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.79% (Acc units); 0.79% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: bid to bid, net income reinvested.

Fund inception: 12 February 1971. I-Class units were launched 1st March 2012. Performance is based on the prices for R-Class units prior to that date.

Schroder Asian Income Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B5BJ7M17)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide income and capital growth in excess of the MSCI AC Pacific ex Japan (Net Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of Asia Pacific companies excluding Japan but including Australia and New Zealand.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of Asia Pacific companies, excluding Japan but including Australia and New Zealand, which offer dividend payments.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC Pacific ex Japan (Net Total Return) index, and compared against the Investment Association Asia Pacific ex Japan sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

China country risk: Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could

become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing Charge	0.94%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee: None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending September 2018 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past Performance

- 1 Performance shown during this period predates the launch of this unit class and has been simulated using the history of a similar unit class within the fund.
- 2 This unit class was managed with reference to the MSCI AC Pacific (Japan at 10%) until December 2009.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 19 February 1990.

Tax Legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Switches: Subject to conditions, you may apply to switch your investment into another unit class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration Policy: A summary of Schroders' remuneration policy and related disclosures is at www.schroders.com/remuneration-disclosures. A paper copy is available free of charge upon request.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that this benchmark is a suitable comparison for performance purposes given the fund's investment objective.

Schroder Recovery Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B3VVG600)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth by investing in equities of UK companies that have suffered a severe setback in either share price or profitability.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the investment manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the FTSE All Share (Gross Total Return) index and the Investment Association UK All Companies sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down, which may adversely impact the performance of the fund.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could

become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Leverage risk: The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing Charge	0.91%
-----------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee: None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending September 2018 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past Performance

1 Performance shown during this period predates the launch of this unit class and has been simulated using the history of a similar unit class within the fund.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 5 May 1970.

Practical Information

Trustee: J. P. Morgan Europe Ltd.

Further Information: You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly reports and the latest price of units from www.schroders.com/ukinvestor and from Schroders, PO Box 1102, Chelmsford, Essex, CM99 2XX, England, telephone 0800 718 777. They are in English, free of charge.

Tax Legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Switches: Subject to conditions, you may apply to switch your investment into another unit class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration Policy: A summary of Schroders' remuneration policy and related disclosures is at www.schroders.com/remuneration-disclosures. A paper copy is available free of charge upon request.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that this benchmark is a suitable comparison for performance purposes given the fund's investment objective.

Schroder US Smaller Companies Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B7LDL923)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth in excess of Russell 2000 Lagged (Gross Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of small-sized US companies.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of small-sized US companies. These are companies that, at the time of purchase, are similar in size to those comprising the bottom 20% by market capitalisation of the North American equity market. The fund may invest in small-sized Canadian companies.

The small cap universe is an extensive, diverse and constantly changing area of the North American market. The investment manager believes smaller companies offer investors exposure to some niche growth areas that, often, cannot be accessed through large companies. They also tend to grow more rapidly than larger companies.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment

schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk and managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the Russell 2000 Lagged (Gross Total Return) index, and compared against the Investment Association North American Smaller Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

THREADNEEDLE EUROPEAN SMALLER COMPANIES FUND (THE "FUND")

Class Z Accumulation Shares (GBP) GB00B84CYY92, a sub-fund of Threadneedle Investment Funds ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the EMIX Smaller European Companies Ex UK Index after charges over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 75% of its assets in shares of smaller Continental European companies.

The Fund selects smaller companies considered to have good prospects for share price growth, from any industry or economic sector, and in some instances, this may provide exposure to niche growth areas that often cannot be accessed through large companies.

The EMIX Smaller European Companies Ex UK Index is regarded as providing an appropriate representation of the share performance of smaller sized companies across Europe (excluding the UK), currently with over 1,000 companies included. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

The Fund typically invests in fewer than 100 companies, which may include shares of some companies not within the EMIX Smaller European Companies Ex UK Index. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Fund permanently invests a minimum of 75% of its assets in European Economic Area equities, and is therefore PEA (Plan d'Epargne en Actions) eligible in France.

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds".

For more information on investment terms used in this document, please see the Funds Glossary published on our website: www.columbiathreadneedle.com.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 5 because historically it has shown a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	3.00%

NON-UCITS RETAIL SCHEME KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

THREADNEEDLE UK PROPERTY AUTHORISED INVESTMENT FUND (THE "COMPANY")

Class 2 Net Income Units (GBP) GB00BQ1YHW31, regulated by the FCA.

This Fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The aim of the Fund is to provide income and to grow the amount you invested.

The Fund is a Property Authorised Investment Fund ("PAIF") for tax purposes.

The Fund will typically invest at least two-thirds of its assets, either directly or indirectly, in commercial real estate in the United Kingdom which is used for business purposes. The Fund may also invest in shares, bonds, gilts, and other funds. The Fund may invest in other assets including cash to efficiently manage the Fund.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell units in the Fund on any day that is a business day in London. You can find more detail on the objective and investment policy of the Fund in the "Investment Objective, Policy and other Details of the Company" section of the Prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw within 5 years.

Risk and Reward Profile

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- It may be difficult or impossible to realise an investment in the Fund because the underlying property held within the Fund may not be readily saleable.
- The value of a property is a matter of a valuer's opinion and the true value may not be recognised until the property is sold by the Fund.
- As the Fund is dual priced, there is a price to buy units and a lower price to sell them. The difference between the two is known as the 'spread'. This Fund's spread reflects the transaction costs of buying and selling commercial property, and other assets. The spread can change at any time and by any amount. As an example, the buying price for shares in this Fund was approximately 6.5% higher than the selling price on 1st April 2019.
- If values in the property market go down or rental income decreases, the Fund's value may be negatively affected.
- Due to the illiquid nature of property and the time it can take to buy or sell assets, under normal circumstances up to 20% of the assets of the Fund into which the Fund invests may be held as cash deposits. In exceptional circumstances, the level of cash held by the Fund may be significantly higher. Holding high levels of cash will have an impact on the performance of the Fund and its distributable income until the excess cash is invested in property assets.
- Shares of the Fund may exhibit significant price volatility.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	0.80%
------------------	-------

Charges taken from the fund under specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure does not take into account property expenses of 0.90%. These expenses include maintenance and repair fees, property insurance, and letting costs.

The ongoing charges figure is based on expenses for the year ending 15/05/19. This figure may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
