Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Sterling Money Market Fund, a Sterling denominated sub fund of the abrdn OEIC I, I Acc Shares (ISIN: GB00B1C42332). This fund is managed by abrdn Fund Managers Limited..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The fund aims to generate income and preserve some capital over the short term (2 years or less) by investing in cash deposits and money market instruments.
Performance Target: The fund targets a return equivalent to SONIA. There is no certainty or promise that the Performance Target will be achieved. SONIA is the Sterling Overnight Index Average and is the representative rate for the return on cash deposits.

Investment Policy

Portfolio Securities

- The fund invests at least 80% in cash deposits and money market instruments (assets that can be turned into cash quickly).
- The fund may also invest in reverse repos, securitisations and asset-backed commercial paper.
- The fund may also invest in other funds (including those managed by Aberdeen Investments).
- The fund qualifies as a money-market fund (MMF) under the MMF Regulation and more specifically as a Standard Variable Net Asset Value (VNAV) MMF.

Management Process

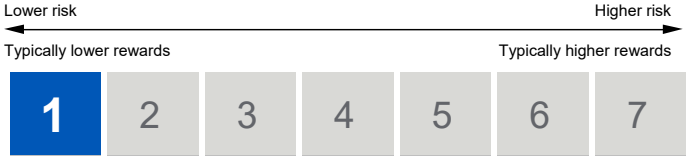

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
- The fund is managed in line with the MMF Regulation which is used as a reference for portfolio management and risk monitoring of the fund. For example, constraints include limits on the average maturity of the portfolio.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/ or generate additional income or growth consistent with the risk profile of the fund.
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivatives include instruments used to manage expected changes in interest rates.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.
The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.
The fund is rated as 1 because of the extent to which the following risk factors apply:

- Money Markets Fund Risk - The fund price and liquidity is not guaranteed and the risk of loss is borne by the investor. An investment in the fund is different from an investment in bank deposits because the value of the investment may fluctuate, for example, due to counterparty default or changes in interest rates.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.
The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
Inflation reduces the buying power of your investment and income.
The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.
The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.
In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.15%

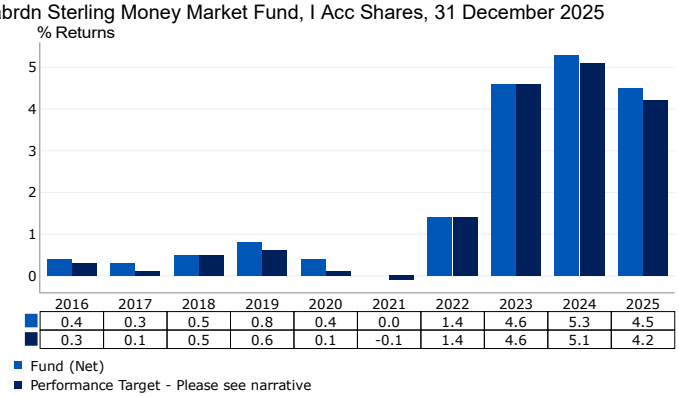

Charges taken from the fund under certain specific conditions

Performance fee	0.00%

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.
The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.
Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.
The annual report for each financial year will include detail on the exact charges made.
The Ongoing Charge figure is as at 31/07/2025.
A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.
Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

Artemis High Income Fund (the "fund")

The fund is managed by Artemis Fund Managers Limited.

ISIN:	GB00B2PLJN71
Class:	I quarterly distribution units, GBP

This key investor information document is accurate as at 18 February 2026.

Objectives and Investment Policy

Objective

To provide a combination of a high level of income and capital growth, before fees, over a rolling five year period. The manager defines a high level of income as equal to, or in excess of, the average yield of the funds in the fund's Investment Association sector, the Strategic Bond sector.

Investment policy

What the fund invests in
• 80% to 100% in bonds (of any credit quality).
• Up to 20% in company shares.
• The fund may also invest in cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.
Use of derivatives
The fund may use derivatives for efficient portfolio management purposes to:
• reduce risk
• manage the fund efficiently.
Where the fund invests
• Globally
Industries the fund invests in
• Any
Other limitations specific to this fund
• At least 80% of the fund will be invested in assets denominated in sterling, or will be hedged back to sterling.
Investment strategy
• The fund is actively managed.
• The manager seeks investments that offer the best value free cashflow available, as cashflow evidenced by an above-average yield on bonds or shares.
• On occasion, investments are made on the basis of future dividend growth.
• The manager focuses on the ability of a bond issuer to pay the interest on a bond and to repay a bond at its expiry, and the valuation attached to a bond as a result.

Benchmarks

IA £ Strategic Bond NR
A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'target benchmark' that the fund aims to outperform. Management of the fund is not restricted by this benchmark.

Other information

Dealing frequency: Normally Monday to Friday except UK public holidays and non-dealing days.
Visit https://www.artemisfunds.com/en-gb/individual/resources/knowledge-centre/understanding-funds/what-are-non-dealing-days/ for more information.
Instructions received before 12 noon UK time will be processed at 12 noon on the same day.
Distribution policy: This is a distribution class. Any income this fund receives will be paid out to investors every 3 months.

Risk and Reward Profile

• The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
• The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
• A risk indicator of "1" does not mean that the investment is "risk free".

Risk indicator number is accurate as at: 31 January 2026.

The risk indicator may not fully take into account the following risks and the following may affect fund performance:
Market volatility risk: The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk: The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Bond liquidity risk: The fund holds bonds which could prove difficult to sell. As a result, the fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
Income risk: The payment of income and its level is not guaranteed.
Credit risk: Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
Higher-yielding bonds risk: The fund may invest in higher-yielding bonds, which may increase the risk to capital. Investing in these types of assets (which are also known as sub-investment grade bonds) can produce a higher yield but also brings an increased risk of default, which would affect the capital value of the fund.
Charges from capital risk: Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Emerging markets risk: Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

ARTEMIS
The Profit Hunter

CHARGES FOR THE FUND

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.715%

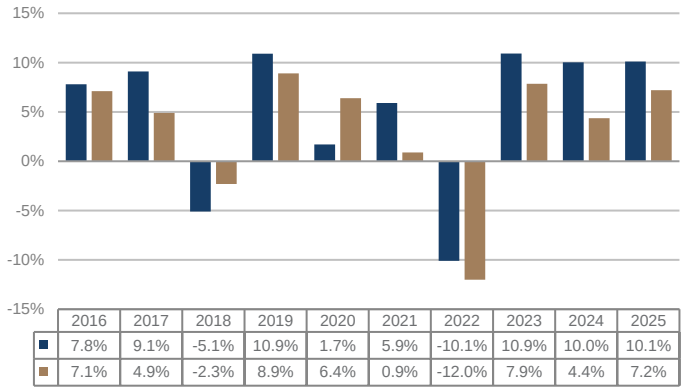

Charges taken from the fund under certain specific conditions	
Performance fee	None

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.
- The ongoing charges figure is an estimate rather than a historic figure because this better reflects the expected future charges. The charges may vary from year to year. The exact charges made for each financial year are contained in the fund's annual report.
- Some or all of the annual management charge is taken from capital

For more information about charges, please see the fund's prospectus, which is available at www.artemisfunds.com or www.fundinfo.com.

Charges are accurate as at: 31 August 2025, unless specified.

PAST PERFORMANCE

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
I quarterly distribution units, GBP	7.8%	9.1%	-5.1%	10.9%	1.7%	5.9%	-10.1%	10.9%	10.0%	10.1%
IA £ Strategic Bond NR	7.1%	4.9%	-2.3%	8.9%	6.4%	0.9%	-12.0%	7.9%	4.4%	7.2%

- How the fund has performed in the past is not a guide to how it will perform in the future.
- This class may have charges or a hedging approach different from those in the IA sector benchmark.
- Past performance is net of all charges except any costs incurred when investors buy or sell the fund.
- Performance is calculated in sterling.
- Fund launch date: 26 May 1995.
- Class launch date: 7 March 2008.

Past performance is accurate as at: 31 December 2025.

PRACTICAL INFORMATION

Trustee: Northern Trust Investor Services Limited

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors Multi-Strategy Target Return Fund, Class 5, Accumulation shares, GBP, a sub-fund of the Aviva Investors Investment Funds ICVC (ISIN: GB00BMTRW439). The Fund is managed by Aviva Investors UK Fund Services Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective: To deliver a positive return over rolling three year periods regardless of the prevailing stock market environment. The Fund aims to generate a positive return, on average 3% per annum above the Bank of England Base Rate before the deduction of charges, over rolling three year periods. In seeking to target this level of return the Fund also aims to manage volatility to a target of less than half the volatility of global equities, measured over the same rolling three year periods. These aims, however, are not guaranteed and it may not always be possible to achieve positive returns or to achieve the target level of volatility over rolling three year periods, or over any period of investment. Consequently, investors' capital is at risk.

Core investment: The Fund invests across a broad range of global asset classes (including emerging markets) that may include shares of companies, bonds (both corporate and government), cash, commodities, indirect property, and currencies. Other funds (including funds managed by Aviva Investors companies) may also be used to gain exposure to these asset classes. The Fund will make significant use of derivative instruments for investment purposes including: futures, options, swaps, swaptions and forwards.

Strategy: The Fund is actively managed and the Investment Manager may take both long and synthetic short positions and derivative usage may include but is not limited to derivatives on interest rates, inflation rates, bonds, credit, equity, financial indices, volatility, dividend payments and currencies. Derivatives usage may be for the purposes of hedging, efficient portfolio management, or investment purposes and may be exchange traded or traded off exchange through market counterparties. The use of derivative instruments as part of the investment policy will mean that the Fund may, from time to time, have substantial holdings in liquid assets including deposits and money market instruments.

This Fund is subject to Aviva Investors' baseline exclusion policy **– please see Appendix 2 of the Prospectus for information on these limited investment restrictions.**

Performance & Risk Measurement: The Fund aims to generate returns which exceed the Bank of England base rate, which has been chosen as the market standard indicator of the risk-free rate of return. The Fund targets 3% above this rate because that is the level of outperformance that the Investment Manager believes to be realistic for this strategy alongside the volatility aim.

The Fund is managed to a defined risk target - linked to the volatility of global equities. Volatility measures how much the returns of the Fund may fluctuate and is an indicator of the level of risk taken by the Investment Manager.

The Fund is expected to operate with a volatility no greater than 50% of that of Global Equities, however, there may be times where the Fund operates above this target. The Index we use to represent global equities is the MSCI® All Country World Index (Local Currency) (the Index). The Fund's volatility is compared against the Index's daily volatility, annualised, over 3-year rolling periods.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark due to the broad range of companies that it represents, and it is therefore an appropriate measure of the volatility of global equities.

Note: MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Other information: You can buy and sell shares on any London business day.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

1	2	3	**4**	5	6	7

Lower risk **Higher risk**

Typically lower rewards Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Currency risk: Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

Derivatives risk: Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

Hedging risk: Any measures taken to offset specific risks will generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

Illiquid securities risk: Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

Commodity Investment The prices of commodities are generally more volatile than investments in more traditional securities such as equities and fixed income. Investment into commodity instruments which are physically backed may have limited recourse, and if the value of the commodities held is insufficient to meet payment obligations the Fund may suffer losses.

Leverage risk: A small price decline on a "leveraged" underlying investment will create a correspondingly larger loss for the Fund. A high overall level of leverage and/or unusual market conditions could create significant losses for the Fund.

Multi-strategy risk: Because the Fund is exposed to the risks of multiple markets and asset classes, there is a risk that some or all of its strategies may not perform or correlate as expected.

Stock and Bond Connect risk: The Fund may invest in China A-Shares via Stock Connect, or bonds on the China Interbank Bond Market via Bond Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

Charges taken from the Fund over a year

Ongoing charges	0.70%

Charges taken from the Fund under certain specific conditions

Performance fee	None

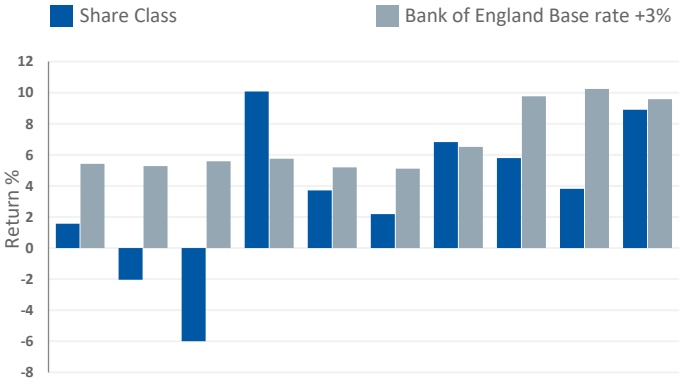

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The ongoing charges figure is based on last year's expenses for the year ending November 2025. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges please see the charges sections of the Fund's Prospectus.

PAST PERFORMANCE

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Share Class	1.6	-2.0	-6.0	10.1	3.7	2.2	6.8	5.8	3.8	8.9
Bank of England Base rate +3%	5.4	5.3	5.6	5.8	5.2	5.1	6.5	9.8	10.2	9.6

Past performance is no guide to future performance. On 23 December 2025 the performance target of the Fund was changed to the Bank of England base rate +3%. Historic performance prior to this date reflects the previous target of the Bank of England base rate +5%.

The past performance shown in the chart opposite takes into account all charges except entry charges.

The Share Class was launched on 01 July 2014.

Performance is calculated in the Share Class currency which is GBP.

Source: Aviva Investors/Morningstar as at 31 December 2025.

AVIVA INVESTORS

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FIDELITY EMERGING MARKETS FUND

a sub-fund of FIDELITY INVESTMENT FUNDS IX
FIDELITY EMERGING MARKETS FUND R-ACC
(ISIN: GB00BMDNKR60)

This fund is managed by FIL INVESTMENT SERVICES (UK) LIMITED

Objectives and investment policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more.

Investment Policy: The fund will invest at least 70% in companies in countries experiencing higher levels of economic growth within Africa, the Indian sub-continent, Latin America, East and South East Asia, Central and Eastern Europe (including Russia) and the Middle East. This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion. The companies will be either listed, incorporated, domiciled, or have significant business activities in the region. The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives. Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

Investment Process: The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index. The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.

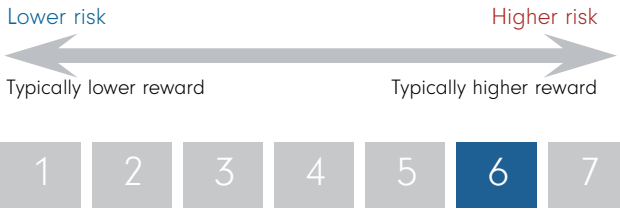

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Base Currency GBP

Distribution: As this is a non-distributing share class, dividends are re-invested.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI Emerging Markets (Net total return) Index.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner. Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses. In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

Fidelity INTERNATIONAL

Charges for the fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

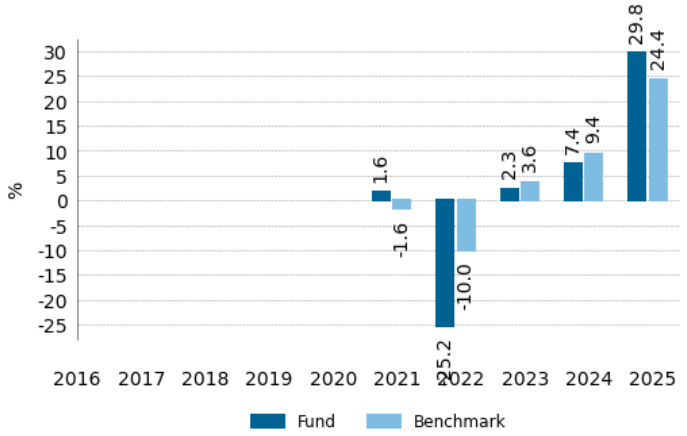

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing Charge	0.69%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 30/06/2025. This figure may vary from year to year. It excludes: • performance fees (where applicable); • portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on July 28, 1997. This share class was launched on May 13, 2020.

Past performance has been calculated in GBP

Practical Information

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FIDELITY INDEX JAPAN FUND

a sub-fund of FIDELITY INVESTMENT FUNDS
FIDELITY INDEX JAPAN FUND P-ACCUMULATION
(ISIN: GB00BHZK8872)

This fund is managed by FIL INVESTMENT SERVICES (UK) LIMITED

Objectives and investment policy

Objective: The fund aims to track the performance (before fees and expenses are applied) of the MSCI Japan (Net Total Return) Index, thereby seeking to increase the value of your investment over 5 years or more.

Investment Policy: The fund uses an index tracking (passive) investment approach whereby it aims to replicate the composition of the index. However, for practical reasons and/or to reduce the dealing costs of the fund, it may not invest in every company share in the index or at its weighting within the index.

Investment Process: As well as investing directly in company shares, the fund will achieve exposure indirectly using derivatives, for example at the time of cash inflows to remain fully invested or to reduce transaction costs. To manage the cash position, the fund may invest in other investment types such as liquidity funds (including those managed by Fidelity).

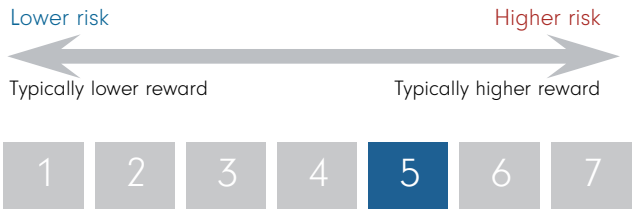

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Base Currency GBP

Distribution: As this is a non-distributing share class, dividends are re-invested.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI Japan (Net total return) Index. Funds that are indexed to an MSCI index are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which the funds or securities are based. The Prospectus contains a more detailed description of the limited relationship MSCI has with Fidelity and any related funds.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. Fidelity International's partial swing pricing policy can cause differences in the fund's performance versus the index. A fund's performance tracking may be affected if the times at which a fund and its benchmark index are priced are different. The fund is priced at midday UK time, and the index is priced when the relevant stock markets close. This can cause apparent differences in the fund's performance versus that of the index than if the fund and the index were priced at the same time.

Fidelity INTERNATIONAL

Charges for the fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

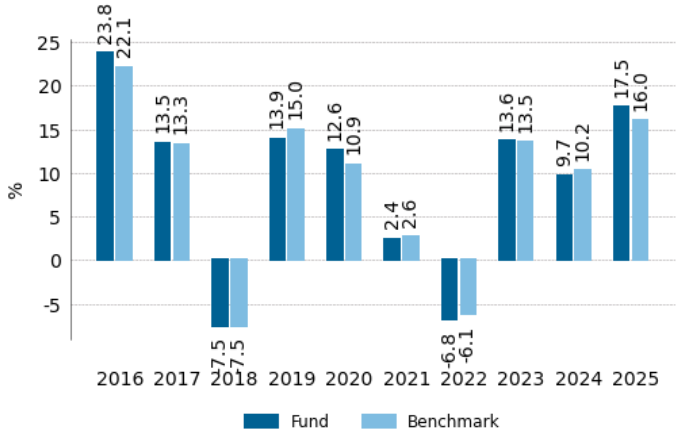

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing Charge	0.10%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 28/02/2025. This figure may vary from year to year. It excludes: • performance fees (where applicable); • portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on Jan. 22, 2014. This share class was launched on Jan. 22, 2014.

Past performance has been calculated in GBP

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

First Sentier Global Listed Infrastructure Fund
Class B (Accumulation) GBP

a sub-fund of First Sentier Investors ICVC (the Company)

ISIN GB00B24HJL45

First Sentier Investors (UK) Funds Limited, the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to achieve an investment return from income and capital growth over the medium to long term (at least three years).

Policy: The Fund invests in shares of companies that are involved in infrastructure around the world and are listed on exchanges worldwide.

The infrastructure sector includes operating assets from the transport, utilities, energy and communications sectors.

The Fund does not invest directly in infrastructure assets.

The Fund may invest up to 10% in other funds.

The Fund will only use derivatives to reduce risk or to manage the Fund more efficiently in limited cases.

Strategy: The Fund's managers strategy is to invest in a globally diversified portfolio of listed infrastructure companies.

The Fund manager's investment strategy is founded on the principle of stewardship, allocating capital to what it believes are good quality companies with sound growth prospects and strong management teams. It seeks to engage actively and constructively with company leaders on sustainability and other investment risks and opportunities.

Benchmark: The Fund's performance is compared against the value of the FTSE Global Core Infrastructure 50/50 Index.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within three years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

Risk and reward profile

Lower Risk ← → **Higher Risk**

Potentially Lower Rewards — **Potentially Higher Rewards**

1	2	3	4	**5**	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments.
- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Single sector risk:** investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Listed infrastructure risk:** the Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.80%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

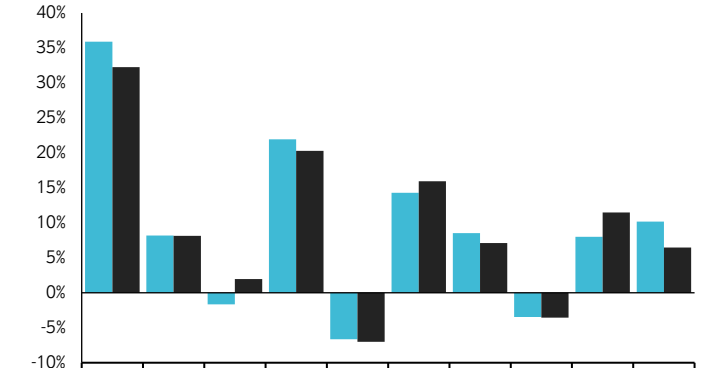

The ongoing charge is based on expenses for the year ending July 2025. It may vary from year to year. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.

Past performance

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
First Sentier Global Listed Infrastructure Fund Class B (Accumulation) GBP	35.9%	8.2%	-1.6%	21.9%	-6.6%	14.3%	8.5%	-3.5%	8.0%	10.2%
FTSE Global Core Infrastructure 50/50 Net Index (GBP)	32.2%	8.1%	2.0%	20.3%	-7.0%	15.9%	7.1%	-3.6%	11.5%	6.5%

The Fund launched on 08 October 2007.

The Share Class launched on 08 October 2007. The past performance of the Share Class is calculated in GBP.

The past performance of the benchmark is calculated in GBP

The Fund's performance comparison to the Investment Association Sector can be found in the Company's prospectus.

Practical information

Depositary: Northern Trust Investor Services Limited

Further information: The Fund forms part of the First Sentier Investors ICVC (the Company). The prospectus, annual and semi-annual reports of the Company as a whole are available free of charge on firstsentierinvestors.com or by contacting First Sentier Investors (UK) Funds Limited, Sunderland, SR43 4LF. All documents are available in English.

Other practical information: The Fund's share price and other information about the Fund is available at firstsentierinvestors.com. The prospectus, annual and semi-annual reports contain information about all of the sub-funds and share classes of the Company.

Tax legislation: The Fund is subject to UK tax laws. This may have an impact on your personal tax position. For further details, please speak to your tax adviser.

Liability statement: First Sentier Investors (UK) Funds Limited (as management company) may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Company.

Fund information: Each sub-fund of the Company is responsible for meeting its own debts. The sub-funds are segregated by law. This means that investments of the Fund cannot be used to pay the debts of the other sub-funds.

You can exchange shares in the Fund for shares in another sub-fund, which is called switching. There may be a charge for switching, as indicated above in 'Charges for this Fund'.

Remuneration: Information on the current remuneration policy of First Sentier Investors (UK) Funds Limited, including a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, is available at firstsentierinvestors.com. A paper copy of this information is available free of charge upon request from First Sentier Investors (UK) Funds Limited, Sunderland, SR43 4LF.

Sustainability Disclosure Regime: This product does not have a UK sustainability investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

This Fund is authorised in the UK and regulated by the Financial Conduct Authority. First Sentier Investors (UK) Funds Limited is authorised and regulated in the UK by the Financial Conduct Authority.

Prior to 22 September 2020 the Company's name was First State Investments ICVC.
This key investor information is accurate as at 12 February 2026.

Key Investor Information

HSBC Asset Management

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: http://www.assetmanagement.hsbc.com.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

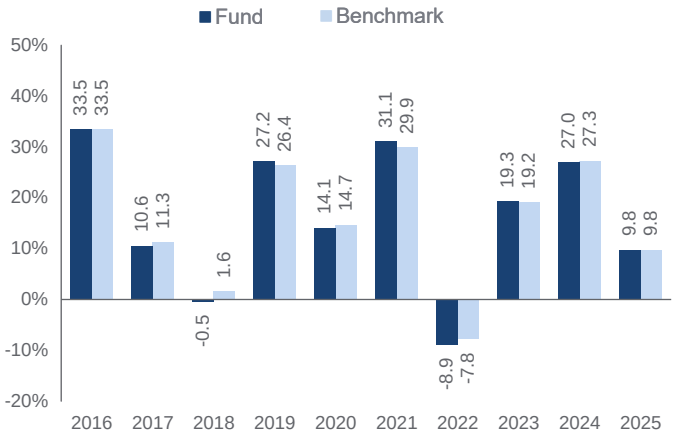

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.07%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2025. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the S&P 500 Index.
- The Fund was launched on 31 October 1988.

Practical Information

Depositary
State Street Trustees Limited.

Further information
Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report and, where applicable, the SDR Consumer Facing Disclosure may be obtained free of charge, in English, from the Administrator, HSBC Asset Management (Fund Services UK) Limited, Sunderland SR43 4BF or by visiting www.assetmanagement.hsbc.com. The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

Share classes
Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

Remuneration Policy
The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at www.assetmanagement.hsbc.com (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

Tax
UK tax legislation may have an impact on your personal position.

Management Company
HSBC Asset Management (Fund Services UK) Limited, the Authorised Corporate Director, may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the OEIC.

Segregated liability
The OEIC is an umbrella investment company with segregated liability between Funds.This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Asset Management (Fund Services UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.
This key investor information is accurate as at 17 February 2026.

ISIN: GB00BF0GX030

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: http://www.assetmanagement.hsbc.com.

Objectives and Investment Policy

- The Fund aims to track the performance of the FTSE 100 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the largest stock market listed companies in the United Kingdom, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

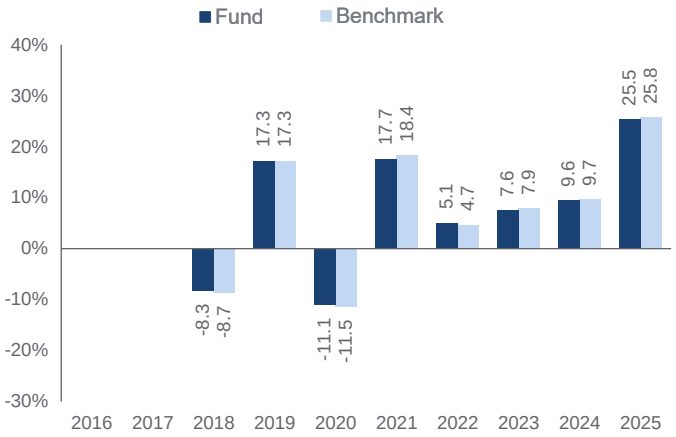

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.07%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2025. Charges may vary from year to year.
- In addition to the ongoing charges, the Fund incurs costs relating to investments in underlying closed ended investments (such as investment trusts). These costs vary and are approximately 0.01%.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the FTSE 100 Index.
- The Fund was launched on 30 September 1994.

Practical Information

Depositary
State Street Trustees Limited.

Further information
Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report and, where applicable, the SDR Consumer Facing Disclosure may be obtained free of charge, in English, from the Administrator, HSBC Asset Management (Fund Services UK) Limited, Sunderland SR43 4BF or by visiting www.assetmanagement.hsbc.com. The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

Share classes
Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

Remuneration Policy
The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at www.assetmanagement.hsbc.com (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

Tax
UK tax legislation may have an impact on your personal position.

Management Company
HSBC Asset Management (Fund Services UK) Limited, the Authorised Corporate Director, may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the OEIC.

Segregated liability
The OEIC is an umbrella investment company with segregated liability between Funds.This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Asset Management (Fund Services UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.
This key investor information is accurate as at 17 February 2026.

Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC Asset Management

S&P 500 Equal Weight Equity Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Accumulation S
ISIN: GB00BSZ8GG29

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: http://www.assetmanagement.hsbc.com.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Equal Weight Thermal Coal Screened Index (the "Index") before the deduction of charges.
- The Index is made up of the largest stock market listed companies in the United States of America. The Index includes all constituents of the S&P 500 Index (the "Parent Index") excluding shares in companies that have 2.5% or more of their revenue generated from thermal coal mining and thermal coal energy generation activities.
- The Index is periodically rebalanced and at each rebalance date all Index constituents are weighted equally. This differs from the Parent Index for which index constituents are weighted by market capitalisation (market value). Between index rebalances, constituent weightings will fluctuate due price movements of the shares of the companies.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

iShares by BlackRock

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

iShares ESG Screened Overseas Corporate Bond Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B58YKH53

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets), by tracking closely the performance of the ICE ESG Global Corporate Ex GBP Index (the Fund's benchmark index).
- The Fund is passively managed and the Investment Manager (IM) has limited discretion to select the Fund's investments and in doing so may take into consideration the benchmark index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- The Fund's benchmark index measures the performance of fixed income securities issued by companies in global markets excluding issues denominated in Pounds Sterling. The Fund's benchmark index also seeks to exclude issuers based on the index provider's environmental, social and governance (ESG) ratings and exclusionary criteria. The benchmark index excludes issuers based on their involvement in certain activities deemed by the index provider to have negative environmental or social outcomes based on their involvement in the following business lines/activities (or related activities): tobacco, nuclear weapons, thermal coal, oil sands, , oil and gas, cluster weapons, depleted uranium, biological and chemical weapons, white phosphorus and small arms. Issuers that are classified by the index provider as violating United Nations Global Compact principles (which are widely accepted corporate sustainability principles that meet fundamental responsibilities in areas such as anti-corruption, human rights, labour and environmental) are also excluded from the benchmark index. The benchmark index excludes companies which score below a certain Sustainalytics ESG Rating which are identified by the index provider as being involved in controversies that have a negative ESG impact on their operations and/or products and services based on a Sustainalytics ESG controversy score.
- The fixed income securities in the Fund's benchmark index will pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which based on one or more underlying assets). The Fund may use derivatives for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.11%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

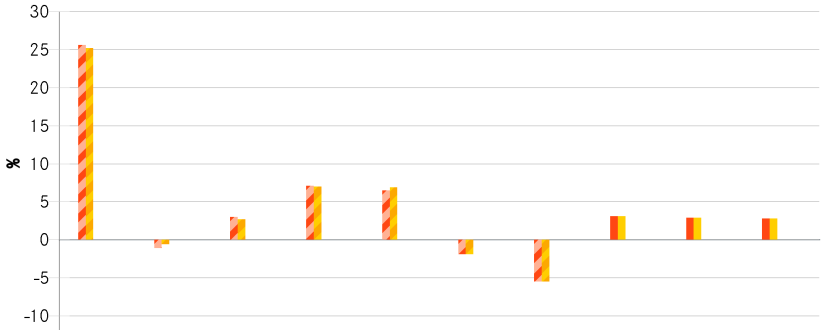

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2011. The unit class was launched in 2012.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†[1]ICE ESG Global Corporate Ex GBP Index (GBP)

Historic performance to 31 December 2025

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Fund	25.6	-1.1	3.0	7.1	6.5	-1.9	-5.5	3.1	2.9	2.8
Target †[1]	25.2	-0.6	2.7	7.0	6.9	-1.9	-5.5	3.1	2.9	2.8

During this period performance was achieved under circumstances that no longer apply.

*Prior to 05 July 2022, the Fund used a different benchmark which is reflected in the benchmark data.

Practical Information

- The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Collective Investment Funds (BCIF). These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com, on the iShares website at www.ishares.com or by calling Investor Services on 0800 44 55 22.
- Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- The Fund is a sub-fund of BCIF, an umbrella structure comprising different sub-funds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- The assets of the Fund are held on trust for its unitholders under English trust law which means that its assets cannot be used to discharge the liabilities of other sub-funds within BCIF. In addition, the Fund's assets are held separately from the assets of other sub-funds.
- Investors may switch their units in the Fund for units in another sub-fund within BCIF, subject to meeting certain conditions as set out in the prospectus.
- The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

iShares Pacific ex Japan Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B849FB47

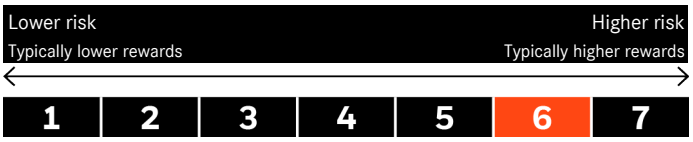

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World Asia-Pacific ex-Japan Index, the Fund's benchmark index.
- The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- The benchmark index measures the performance of equity securities of leading companies listed in the Asia Pacific region excluding Japan. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 30 June 2026. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None

Jupiter Strategic Bond Fund I-Class

I-Class Accumulation Units, ISIN: GB00B4T6SD53

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide income with the prospect of capital growth to provide a return, net of fees, over the long term (at least five years).

Policy

At least 70% of the Fund is invested in global fixed interest securities including sub-investment grade (also known as high yield) bonds, investment grade bonds, government bonds, preference shares, convertible bonds and other bonds denominated in sterling or hedged back to sterling.

Up to 30% of the Fund may be invested in other transferable securities, open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns (i.e. for investment purposes) and/or reducing the overall costs and risks of the Fund.

Strategy

The Investment Manager seeks to achieve the fund objective, by striving to explore the full breadth of the global Fixed Income universe and to maintain a balance between macroeconomic and company-level risk.

The portfolio construction process starts with a macroeconomic analysis which determines the willingness to take credit or duration risk, the broad asset allocation of the strategy as well as the geographic areas of focus. The team of credit analysts screens the global credit universe within Developed and Emerging markets to find credits that offer an attractive forward-looking return considering the risk assessment.

The Investment Manager seeks to maintain a diverse portfolio of investments.

Benchmarks

Comparator benchmark - IA Sterling Strategic Bond

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Sterling Strategic Bond.

Active Management

The Fund is actively managed. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk — **Typically higher rewards, higher risk**

1	2	3	**4**	5	6	7

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Interest Rate Risk** - The Fund can invest in assets whose value is sensitive to changes in interest rates (for example bonds) meaning that the value of these investments may fluctuate significantly with movement in interest rates, e.g. the value of a bond tends to decrease when interest rates rise.
- **Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Credit Risk** - The issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due.
- **Derivative risk** - the Fund may use derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment.
- **Contingent convertible bonds** - The Fund may invest in contingent convertible bonds. These instruments may experience material losses based on certain trigger events. Specifically these triggers may result in a partial or total loss of value, or the investments may be converted into equity, both of which are likely to entail significant losses.
- **Counterparty Default Risk** - the risk of losses due to the default of a counterparty on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- **Sub investment grade bonds** - The Fund may invest a significant portion of its assets in securities which are those rated below investment grade by a credit rating agency. They are considered to have a greater risk of loss of capital or failing to meet their income payment obligations than higher rated investment grade bonds.
- For a more detailed explanation of risk factors, please refer to the "**Risk Factors**" section of the Scheme Particulars.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the Fund over a year

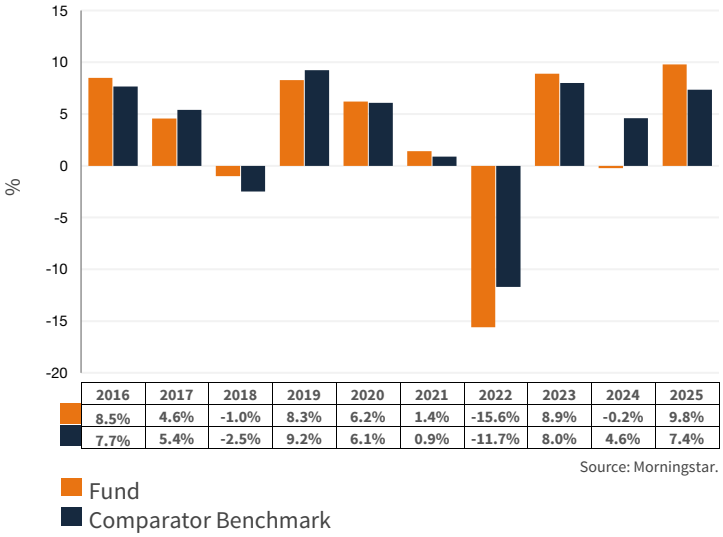

Ongoing charges	0.73%

Charges taken from the Fund under specific conditions

Performance fee	None

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. With effect from 23/02/24 the fixed annual charge may be subject to a discount based on the value of the Fund's scheme property. The current discount rate, if applicable, can be found at www.jupiteram.com/uk/en/professional/tiered-pricing-on-the-fixed-annual-charge/. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in section 18 of the Scheme Particulars which are available from Jupiter on request.

Past performance

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Fund	8.5%	4.6%	-1.0%	8.3%	6.2%	1.4%	-15.6%	8.9%	-0.2%	9.8%
Comparator Benchmark	7.7%	5.4%	-2.5%	9.2%	6.1%	0.9%	-11.7%	8.0%	4.6%	7.4%

Source: Morningstar.

- Past performance is not a guide to future performance.
- Fund launch date: 02/06/2008
- Share/unit class launch date: 19/09/2011
- Performance is calculated in GBP.
- On 15/05/2023 the Funds Objective, Policy and Target Benchmark changed. From that date the Target Benchmark of the IA £ Strategic Bond Sector average was removed and the Fund no longer has a Target Benchmark. The IA £ Strategic Bond Sector average has been retained as a Comparator Benchmark for performance comparison purposes only.
- The past performance shown in the chart includes all charges except any entry and exit charges.
- Comparator Benchmark - IA Sterling Strategic Bond

Practical information

- The Trustee and Depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- Further information can be found by requesting the Scheme Particulars or annual and half-yearly report and accounts which are available from Jupiter on request by contacting our Customer Services Team on 0800 561 4000. These documents are available in English and are free of charge.
- Jupiter operates a Group-wide remuneration policy, overseen by an independent Remuneration Committee. Details of this policy, including an overview of remuneration elements and associated governance processes, are set out on our website www.dms-api.jupiteram.instinctcentral.io/documents/permalink/Jupiter-Remuneration-Policy.pdf. A paper copy of these Remuneration Disclosures is available free of charge, upon request.
- Unit prices can be found by visiting the Jupiter website, www.jupiteram.com.
- Tax law may have an impact on your own tax position. We advise you to take tax advice where necessary.
- Jupiter Unit Trust Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Scheme Particulars of the Fund.
- Other unit classes are available. Further information is available from Jupiter on request.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General All Stocks Gilt Index Trust
Unit Class I GBP Accumulation – ISIN: GB00B8344798

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "**Manager**").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index (the "Benchmark Index") before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index comprises government or other public bonds (a type of loan that pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
- The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
- The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
- The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- This Fund may be suitable for investors looking to invest in bonds issued by the UK government (known as gilts), as represented by the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- Units of the Fund can be bought or sold on any dealing day, as defined in the Prospectus. The non-dealing day calendar is available at www.lgim.com/utndd.
- The Fund's base currency is denominated in sterling (GBP).

RISK AND REWARD PROFILE

Lower Risk ⟷ Higher Risk

Potentially lower rewards ⟷ Potentially higher rewards

1	2	3	**4**	5	6	7

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- The Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

Legal & General
INVESTMENT MANAGEMENT

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.15%
Charges taken from the fund under certain specific conditions	
Performance fee	None

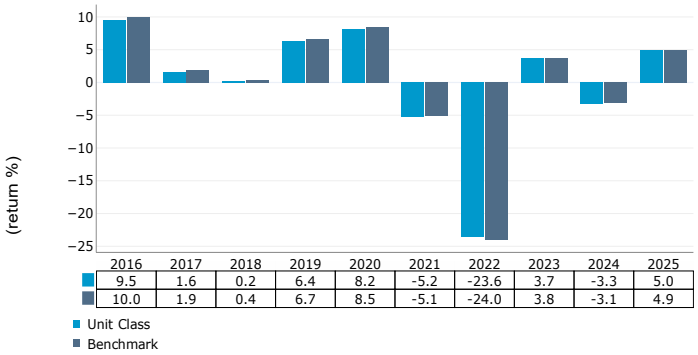

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at 28 February 2026. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution adjustment**: on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Unit Class	9.5	1.6	0.2	6.4	8.2	-5.2	-23.6	3.7	-3.3	5.0
Benchmark	10.0	1.9	0.4	6.7	8.5	-5.1	-24.0	3.8	-3.1	4.9

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2012.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its Prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.
- Investors can get other practical information, including the latest prices, dilution adjustment and details of any other unit classes that are available, by calling us on 0370 050 0955 Monday to Friday between 9:00a.m. to 5:00p.m. Call charges will vary.
- This Fund is subject to the tax legislation of the United Kingdom, which may have an impact on each investor's personal tax position.
- Legal & General (Unit Trust Managers) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.
- Details of our Remuneration Policy including our Remuneration Committee and how remuneration and benefits are calculated can be accessed from www.lgim.com/remuneration. A paper copy is also available free of charge upon request.

Key Investor Information

Legal & General Global Inflation Linked Bond Index Fund
Unit Class I GBP Accumulation – ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "**Manager**").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Bloomberg World Government Ex UK Inflation Linked Bonds Hedged GBP Index (the "Benchmark Index") before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
- The Benchmark Index is comprised of bonds (a type of loan that pays interest) issued by governments across all geographical areas (excluding the UK) which are denominated in the local currency of the country and which are linked to the rate of inflation in the country.
- The Fund may invest in sub-investment grade bonds. The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Benchmark Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund may also invest in bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund will use forward foreign exchange or currency future derivatives in order to manage the currency exposure in line with the Benchmark Index. The Fund may use other types of derivatives (contracts which have a value linked to the price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- This Fund may be suitable for investors looking to invest in global inflation linked bonds excluding those issued by the UK government, as represented by the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- Units of the Fund can be bought or sold on any dealing day, as defined in the Prospectus. The non-dealing day calendar is available at www.lgim.com/utndd.
- The Fund's base currency is denominated in sterling (GBP).

RISK AND REWARD PROFILE

Lower Risk ← → Higher Risk

Potentially lower rewards ← → Potentially higher rewards

1	2	3	**4**	5	6	7

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- The Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.

M&G Investments

M&G Emerging Markets Bond Fund

a sub-fund of M&G Investment Funds (3)
Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53
Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than that of a composite index over any five-year period.
The composite index is 1/3 JPM EMBI Global Diversified Index, 1/3 JPM CEMBI Broad Diversified Index and 1/3 JPM GBI-EM Global Diversified Index.
Core investment: At least 80% of the fund is invested, directly or through derivatives, in bonds issued by the governments, government-related institutions or companies of emerging markets. These bonds can be denominated in any currency, including emerging market currencies. The fund invests in bonds of any credit quality and may invest up to 100% in high yield bonds.
Other investments: The fund may invest in asset-backed securities, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.
Derivatives usage: For investment purposes and to reduce risk and cost.
Strategy in brief: The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by indepth analysis of individual bond issuers. The fund is diversified by investing in a range of bonds across emerging markets.
Benchmark: A composite index comprising:
- 1/3 JPM EMBI Global Diversified Index
- 1/3 JPM CEMBI Broad Diversified Index
- 1/3 JPM GBI-EM Global Diversified Index

The benchmark is a target which the fund seeks to outperform. The composite index has been chosen as the benchmark as it best reflects the scope of the fund's investment policy. The benchmark does not constrain portfolio construction.
The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.
For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Additional information can be found on the M&G website, including:
- a glossary providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information
The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.
You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

Low risk — High risk

Typically lower rewards — Typically higher rewards

1	2	3	**4**	5	6	7

- The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

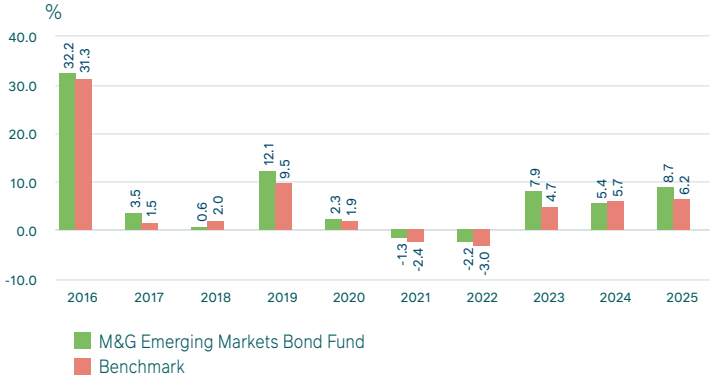

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.68%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 30 June 2025. This figure may change from year to year. It excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.70%. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation excludes UK taxes from 01 January 2017. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The fund launched on 15 October 1999 and the Sterling Class I Accumulation share class launched on 19 April 2012.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.

Benchmark:
01 January 2016 to 31 December 2025: 1/3 JPM EMBI Global Diversified Index, 1/3 JPM CEMBI Broad Diversified Index, 1/3 JPM GBI-EM Global Diversified Index

Practical information

The depositary is NatWest Trustee and Depositary Services Limited.

For more information about this fund, please visit www.mandg.co.uk/literature where you will find a copy of the Prospectus, Articles of Incorporation, and the latest annual or interim Investment Report and Financial Statements. These documents are in English and are available free of charge. Our website also provides other information such as share prices.

UK tax laws apply to the fund, and this may affect your personal tax position. Please speak to an adviser for more information.

M&G Securities Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the fund.

The fund is a sub-fund of M&G Investment Funds (3), an umbrella Open Ended Investment Company (OEIC). The Prospectus, and annual or interim Investment Report and Financial Statements contain information about all of the sub-funds in M&G Investment Funds (3).

The assets of each sub-fund within the umbrella OEIC are segregated by law. This means that the assets belong exclusively to that sub-fund and shall not be used or made available to pay the debts of any other sub-fund or the umbrella OEIC.

You may switch between other sub-funds of M&G Investment Funds (3). An entry charge may apply. Details on switching are provided in the Important Information for Investors document and the fund's Prospectus, or by calling M&G Customer Relations on 0800 390 390.

Other share classes may exist for the fund as set out in the relevant Prospectus.

For up-to-date details of the staff remuneration policy that applies to M&G Securities Limited, including a description of how remuneration and benefits are calculated, the make-up of the remuneration committee, and the identities of persons responsible for awarding the remuneration and benefits, please visit www.mandg.co.uk/remuneration. We will provide a paper copy of this information, free of charge, if you require one.

M&G Global Dividend Fund

Sterling Class I – Accumulation shares ISIN no. GB00B39R2Q25

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide:

- an income distribution that increases every year;
- a dividend yield above that available from the MSCI ACWI Index over any five-year period; and
- a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than that of the MSCI ACWI Index over any five-year period.

Core investment: At least 70% of the fund is invested in the shares of companies, across any sector and of any size, from anywhere in the world.

Other investments: The fund may invest in other funds and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risk and costs.

Strategy in brief: The fund manager focuses on companies with the potential to grow their dividends over the long term and selects stocks with different sources of dividend growth to build a fund that has the potential to cope in a variety of market conditions. When attempting to grow distributions, the fund manager's main focus is on delivering an increase in sterling terms.

Benchmark: MSCI ACWI Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and income objective and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Additional information can be found on the M&G website, including:

- a glossary providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Low risk — High risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

- The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its Net Asset Value has shown medium to high rises and falls in value historically.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

M&G Global Macro Bond Fund

Sterling Class I – Accumulation shares ISIN no. GB00B78PGS53

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than the average return of the Bloomberg Global Aggregate Index Unhedged USD over any five-year period.

Core investment: At least 80% of the fund is invested, directly or through derivatives, in bonds of any credit quality and asset-backed securities. These securities can be issued by governments, government-related institutions and companies from anywhere in the world, including emerging markets. These securities can be denominated in any currency.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund is a flexible global bond fund. The fund manager selects investments based on an assessment of macroeconomic factors such as economic growth, interest rates and inflation. This analysis determines which areas of the bond and currency markets the fund manager believes the fund should invest in. It also influences the subsequent selection of individual bonds and the fund's currency exposures.

Benchmark: Bloomberg Global Aggregate Index Unhedged USD

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy . The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Key Investor Information

RATHBONES ASSET MANAGEMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone Income Fund (I Acc)

Fund Manager: Rathbones Asset Management Limited

I Acc ISIN GB00B3Q9WG18

Objectives and investment policy

The objective of the fund is to deliver an annual income that is in line with or better than that of the FTSE All-Share Index over any rolling three-year period. The fund aims to generate a greater total return than the FTSE All-Share Index, after fees, over any five-year period.
There is no guarantee that this investment objective will be achieved over five years, or any other time period.
We use the FTSE All-Share Index as a target for our fund's return and the income we pay because we want to offer you a better income and higher returns than the UK stock market.
We also compare our fund against the IA UK Equity Income sector because the funds in it are similar to ours.

To meet the objective, the fund manager will invest at least 80% of our fund in UK-listed shares, with the remainder in global shares, cash, short-term deposits and UK government debt. Derivatives may be used by the fund for the purposes of efficient portfolio management and hedging.

Our fund is designed for investors with a basic knowledge of shares who seek income. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss. For definitions please visit the glossary on our website. You can buy and sell units on each business day of the fund between 9am and 5pm.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Typically lower rewards, Lower risk

Typically higher rewards, Higher risk

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk.

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

However, the lowest category (1) does not mean a risk free investment.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Liquidity risk: Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Concentration Risk: The fund invests in a small number of investments. This means that the performance of a single stock within the portfolio has a greater effect on the value of the fund. This can result in large gains or losses based on the performance of a single stock.

The risk indicator for this fund reflects the following:
- As an asset class, shares have greater risk than either bonds or money market instruments.

Charges

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	0.79%
Charges taken from the Sub-Fund under certain specific conditions.	
Performance Fee	None

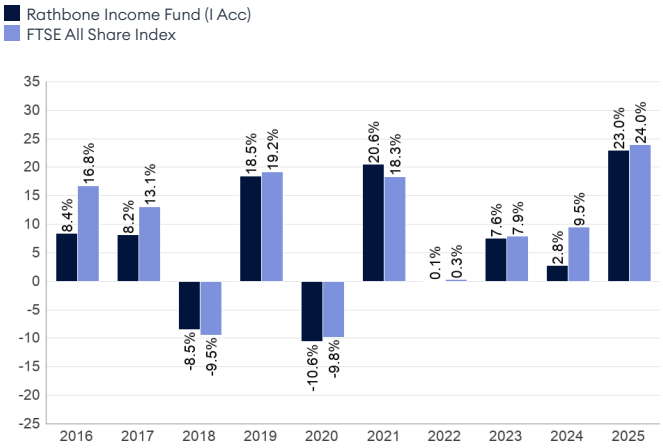

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing RAM@Rathbones.com.

The charges you pay are used to pay for the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment. The fund manager receives an annual fee, which is included in the ongoing charges shown. Ongoing charges are the same for all investors in the same class. The charges shown are based on actual fees and expenses. The ongoing charges figure excludes portfolio transaction costs.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

Past performance

The performance of this Class is calculated in GBP

This share class launched on 01 March 2012.

The Fund launched on 01 February 1971.

Past performance should not be seen as an indication of future performance. Basis of performance: Price performance based upon mid to mid price. Past performance is reported on a full calendar year basis.

Practical information

Depositary: NatWest Trustee and Depositary Services

Tax: Investors should note that the tax legislation that applies to the fund may have an impact on the personal tax position of their investment in the fund. Contact your adviser to discuss tax treatment and the suitability of this investment.

Additional information: This Key Investor Information Document (KIID) may not contain all the information you need. ROYAL LONDON ASSET MANAGEMENT

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Corporate Bond Fund (Accumulation - Class Z Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BN13X436
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund aims to provide a return greater than that of the Markit iBoxx Sterling Non-Gilts Total Return All Maturities GBP Index over rolling 5-year periods, through a combination of capital growth and income, after the deduction of charges.

Policy At least 80% of the Fund is invested in bonds (investment grade corporate bonds, investment grade index-linked corporate bonds, supranational bonds, agency bonds), floating-rate notes, securitisations and asset-backed securities, denominated in sterling or hedged back to sterling.

The remainder of the Fund (up to 20%) may be invested in other types of bonds (government bonds, sub-investment grade bonds, unrated bonds and bonds denominated in currencies other than sterling which remain unhedged), other transferable securities (including preference shares) and money market instruments.

Up to 10% of the Fund may be invested in other funds known as collective investment schemes (including exchange-traded funds and funds managed by Royal London Unit Trust Managers Limited or another Royal London Group company).

The Fund may use derivatives for the purpose of Efficient Portfolio Management (including hedging). The use of derivatives for this purpose is unlikely to increase the risk profile of the Fund.

Cash may be held for investment purposes and to manage inflows and outflows of investors' money in the Fund, however cash is not expected to exceed 5% of the Fund.

Strategy The Fund is actively managed, meaning the Investment Manager uses its expertise to select investments to meet the objective.

Benchmark The target benchmark is the Markit iBoxx Sterling Non-Gilts Total Return All Maturities GBP Index (the "Index") which represents a broad range of investment grade bonds issued by companies and denominated in sterling.

The Index has been selected as a target benchmark because it is representative of the type of bonds in which the Fund invests and is therefore an appropriate measure for the Fund's performance.

The performance comparator for the Fund is the IA Sterling Corporate Bond sector (the "IA Sector").

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 3-5 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Hedging reduces risk by protecting an investment with another related investment.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	3	**4**	5	6	7

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

The fund is shown in risk category 4 because its share price has shown a medium level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.
The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.
A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.
The indicator is calculated using a standard methodology derived from EU rules.
The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.
The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:
Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.
Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.
EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.
Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.
Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.
Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.
Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

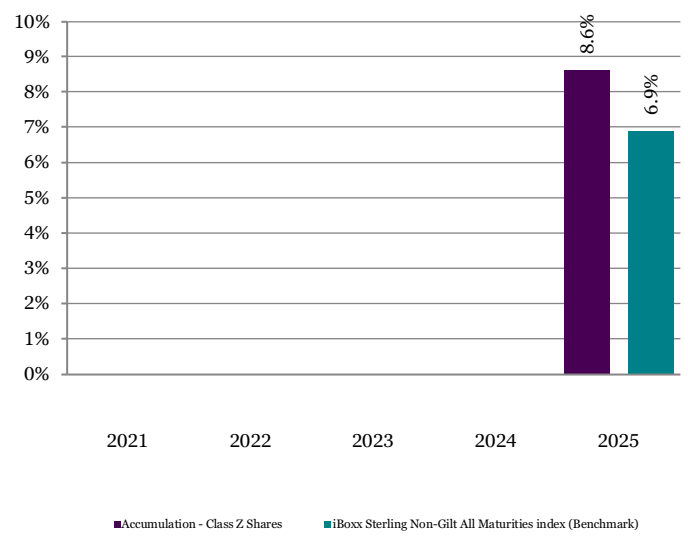

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.35%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.
The Fund was launched on 29 March 1999 as a unit trust and converted to an open-ended investment company (OEIC) on 30 April 2010. The share class was launched on 20 August 2024.

The Royal London Corporate Bond Fund
(Accumulation - Class Z Shares) *in GBP*

Source: RLAM and DataStream as at 31 December 2025

Past performance is not a guarantee or reliable indicator of future returns. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

ROYAL LONDON ASSET MANAGEMENT

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Short Duration Credit Fund (Accumulation - Class Z Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KW917
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund aims to provide a return greater than that of the ICE Bank of America Merrill Lynch 1-5 Year Sterling Non-Gilt Total Return Index over rolling 3-year periods, through a combination of capital growth and income, after the deduction of charges.

Policy At least 80% of the Fund is invested in corporate bonds, supranational bonds, agency bonds, floating-rate notes and asset-backed securities which are denominated in sterling or hedged back to sterling. Within this segment, 70% have a duration of less than five years.

The remainder of the Fund (up to 20%) may be invested in UK government bonds and also corporate bonds, supranational bonds, agency bonds and government bonds that are denominated in a currency other than sterling, transferable securities (including preference shares) and money market instruments.

Up to 10% of the Fund may be invested in other funds known as collective investment schemes (including funds managed by Royal London Unit Trust Managers Limited or another Royal London Group company).

The Fund may use derivatives for the purposes of Efficient Portfolio Management (including hedging). The use of derivatives for this purpose is unlikely to increase the risk profile of the Fund.

Cash may be held for investment purposes and to manage inflows and outflows of investors' money in the Fund, however cash is not expected to exceed 5% of the Fund.

Strategy The Fund is actively managed, meaning the Investment Manager uses its expertise to select investments to meet the objective.

Benchmarks The target benchmark is ICE Bank of America Merrill Lynch 1-5 Year Sterling Non-Gilt Total Return Index (the "Index") which represents a range of short-dated sterling denominated bonds, not including those issued by the UK government.

The Index has been selected as a target benchmark because it is representative of the type of bonds in which the Fund invests, and it is therefore an appropriate measure for the Fund's performance.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Duration is an investment's sensitivity to interest-rate changes measured in years.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	**3**	4	5	6	7

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

The fund is shown in risk category 3 because its simulated price has shown a medium to low level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

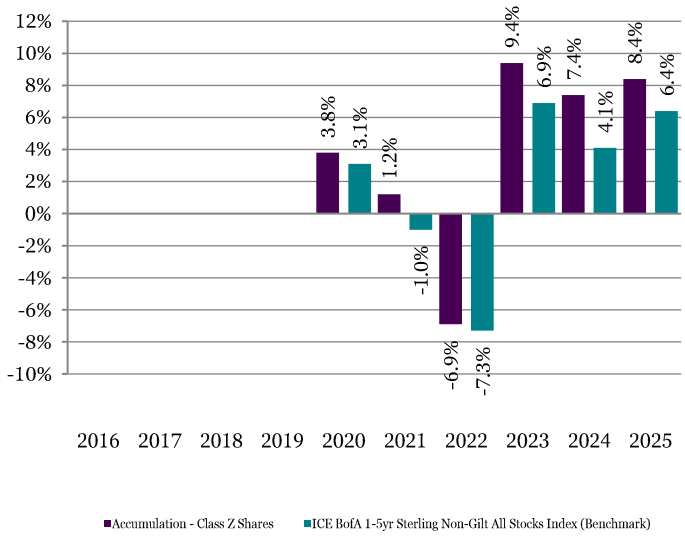

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.31%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
The ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The Fund was launched on 12 April 2019 and the share class on 12 April 2019.
The Fund was formed by a merger on 12 April 2019. The performance shown below is that of the merging fund. The merging fund had the same investment objectives and policy as this fund.

The Royal London Short Duration Credit Fund (Accumulation - Class Z Shares) *in GBP*

Source: RLAM and DataStream as at 31 December 2025

Past performance is not a guarantee or reliable indicator of future returns. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Schroders

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Schroder Recovery Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B3VVG600)

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the FTSE All Share (Gross Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of UK companies that have suffered a severe setback in either share price or profitability.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the investment manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the FTSE All Share (Gross Total Return) Index, and compared against the MSCI UK Value (Gross Total Return) Index and the Investment Association UK All Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used for investment purposes and/ or to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.91%

Charges taken from the fund under certain specific conditions
Performance fee
None

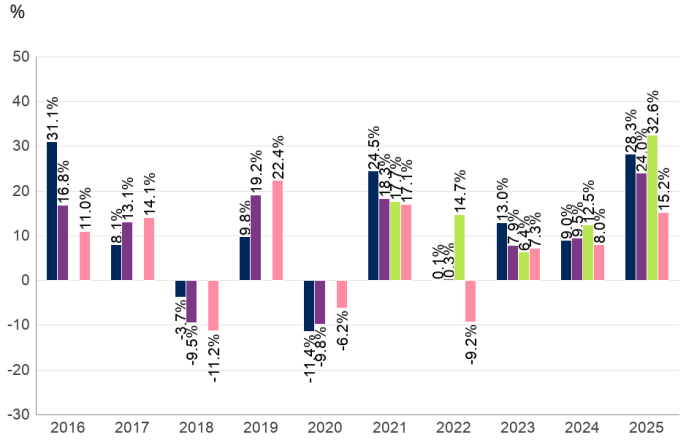

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2025 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.91%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Please note that the fund's benchmarks were changed on 31 March 2021. The past performance in the above table is based on the fund's benchmarks (Target benchmark: FTSE All Share (Gross Total Return) Index. Comparator benchmark: the Investment Association UK All Companies sector average return) in place prior to this date. Going forward, this table will show past performance from this date based on the new benchmarks (Target benchmark: FTSE All Share (Gross Total Return) Index. Comparator benchmarks: MSCI UK Value (Gross Total Return) Index and the Investment Association UK All Companies sector average return).

- Z Accumulation GBP (GB00B3VVG600)
- FTSE All Share (Gross Total Return) Index
- MSCI UK Value (Gross Total Return) Index
- Investment Association UK All Companies sector average

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 05/05/1970.
The shareclass was launched on 02/08/2011.
Performance figures are only available since the launch of the respective share class.

Practical information

Trustee:J. P. Morgan Europe Ltd.

Further Information: You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly reports and the latest price of units from **www.schroders.com/ukinvestor** and from Schroders, PO Box 1402, Sunderland, SR43 4AF, England, telephone 0800 182 2399. They are in English, free of charge.

Tax Legislation: The fund is subject to UK tax legislation which may have an impact on your personal tax position.

Liability: Schroder Unit Trusts Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the fund's prospectus.

Switches: Subject to conditions, you may apply to switch your investment into another share class within this fund or in another Schroder fund. Please see the prospectus for more details.

Remuneration policy: A summary of Schroders' remuneration policy and related disclosures is at **www.schroders.com/remuneration-disclosures.** A paper copy is available free of charge upon request.
The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Glossary: You can find an explanation of some of the terms used in this document at **www.schroders.com/ukinvestor/glossary.**

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Manager and the Manager believe that each of these benchmarks is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Schroders

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Schroder US Smaller Companies Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B7LDL923)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the Russell 2000 Lagged (Net Total Return) Index (after fees have been deducted) over a 3 to 5 year period by investing in equities of small-sized US companies.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of small-sized US companies. These are companies that, at the time of purchase, are similar in size to those comprising the bottom 20% by market capitalisation of the North American equity market. The fund may invest in small-sized Canadian companies.

The small cap universe is an extensive, diverse and constantly changing area of the North American market. The investment manager believes smaller companies offer investors exposure to some niche growth areas that, often, cannot be accessed through large companies. They also tend to grow more rapidly than larger companies.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk and managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the Russell 2000 Lagged (Net Total Return) Index, and compared against the Investment Association North American Smaller Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Smaller companies risk: Smaller companies generally carry greater liquidity risk than larger companies, meaning they are harder to buy and sell, and they may also fluctuate in value to a greater extent.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.92%

Charges taken from the fund under certain specific conditions

The policy includes a description of how remuneration and benefits are calculated & the identities of persons responsible for awarding the remuneration and benefits.

Glossary: You can find an explanation of some of the terms used in this document at **www.schroders.com/ukinvestor/glossary**.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that this benchmark is a suitable comparison for performance purposes given the fund's investment objective.

Key Investor Information

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Montanaro Global Select Fund (the "Fund"),

a fund within WS Montanaro Funds (the "Company")
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

GBP B Accumulation Shares (ISIN: GB00BMF39M28)

Objective and Investment Policy

Objective

To achieve capital growth (an increase in value of the Fund) in excess of the MSCI World SMID (Small and Medium) Cap Index (Total Return) after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 60% of the Fund in the shares of small and medium sized companies, including REITs (Real Estate Investment Trusts are companies that aim to generate an income and/or profit from investing in property), in Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Iceland, Ireland, Israel, Italy, Japan, Luxembourg, Malta, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, Taiwan, United Kingdom and United States; that have a market capitalisation (the total value of the company) which is less than the largest company by value in the MSCI World SMID Cap Index.

The Fund may also invest up to 40% worldwide in larger companies, including REITs, money market instruments (which are short term loans that pay interest) and cash. The Investment Manager will invest in shares of companies in accordance with their Ethical, Environmental, Social and Governance (ESG) Policy. This policy prevents, for example, investment in any shares that have more than 10% in revenue from the following: weapons, tobacco, gambling, pornography and alcohol. (The full ESG policy is available at www.waystone.com).

In addition, the Investment Manager buys companies that in their opinion are of high quality, well-managed, with sound balance sheets and operate in markets that offer the potential to grow faster than the economy as a whole.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each business day.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the Fund.

The Investment Manager buys companies that in their opinion are of high quality, well-managed, with sound balance sheets and operate in markets that offer the potential to grow faster than the economy as a whole.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

Lower risk **Higher risk**

Typically lower rewards — Typically higher rewards

1	2	3	4	5	**6**	7

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns may have varied. It is a measure of the Fund's volatility. As the Fund has less than 5 years history, this calculation incorporates the volatility of an appropriate benchmark index.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 6 because its volatility has been measured as above average to high.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- Currency Risk: As the Fund invests in overseas securities, movements in exchange rates, when not hedged, cause the value of your investments to increase or decrease. Currency hedging, where applied, may not fully eliminate this risk and mismatches can occur.
- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Derivative Risk: The Fund may use derivatives, which can be complex instruments. A derivative may not perform as expected and can create losses greater than its initial cost. A relatively small movement in value of the underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund held the underlying investment directly.
- Liquidity Risk: The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.
- Ethical and ESG Investments Risk: The Fund is prevented from investing in certain sectors or companies. This narrower range may constrain the Fund's performance. If an investment no longer meets the ethical exclusion criteria it will be sold and the price obtained may be less than could be obtained if a forced sale was not required.
- Concentration Risk: The Fund intentionally holds a relatively small number of investments and may also invest in securities within a particular industry, sector or geographical focus. This means that the performance of a single investment, industry, sector or region may have a greater impact on the Fund's value. The value of the Fund may therefore be subject to large swings (both up and down) compared to a more diversified portfolio.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.

Charges taken from the Fund over the year	
Ongoing Charges	0.65%

Charges taken from the Fund under certain specific conditions	
Performance Fee	None

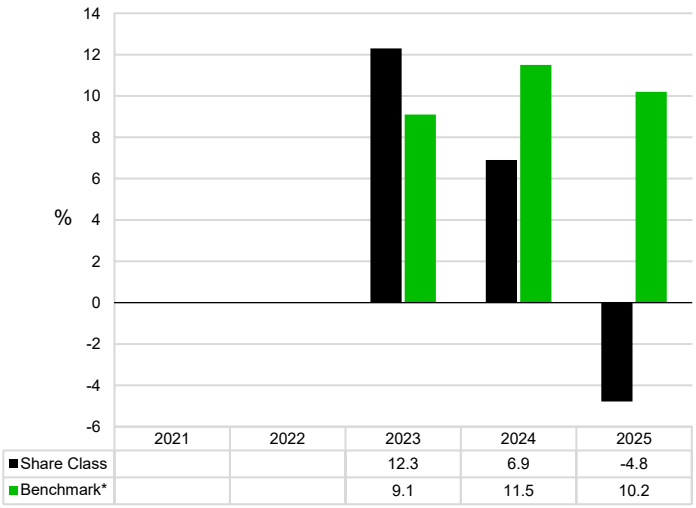

The ongoing charges figure is capped at 0.65%. The actual ongoing charge figure is 0.76% based on expenses as at 31 December 2025. Where the ongoing charge falls below the cap the actual figure applies. This figure may vary from year to year.

The ongoing charges are taken from the income of the Fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

A dilution adjustment (an adjustment to cover the dealing costs incurred by the Fund) may be applied when you buy or sell shares. This changes the price you pay or receive and is normally only applied when dealing costs are significant.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at www.waystone.com.

Past Performance

	2021	2022	2023	2024	2025
Share Class			12.3	6.9	-4.8
Benchmark*			9.1	11.5	10.2

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 31 January 2020. This share class was launched on 17 May 2022.

Past performance is calculated in GBP.

*Benchmark: MSCI World SMID Cap Index TR.

Practical Information

WS Montanaro Funds

This key investor information document describes a fund within the Company. The prospectus and periodic reports are prepared for the entire Company.

Documents

Details of Waystone Management (UK) Limited remuneration policy (including a description of how remuneration and benefits are calculated and the composition of the remuneration committee) are available at www.waystone.com or by requesting a paper copy free of charge (see above for contact details).

Prices of shares and further information

You can check the latest prices by calling 0345 922 0044 or by visiting our website www.waystone.com.

Right to switch

Subject to any restrictions on the eligibility of investors for a particular share class, a shareholder in one fund may be able at any time to switch all or some of their shares in one fund for shares in another fund, if available, in the Company. Please see the prospectus for full details.

Fund Segregation

The Company is an umbrella fund with segregated liability between funds. This means that the holdings of this Fund are maintained separately under UK law from the holdings of other funds of the Company and your investment in this Fund will not be affected by any claims against another fund of the Company.

Depositary

The Bank of New York Mellon (International) Limited is the trustee or depositary of the Company.

Tax

UK tax legislation may have an impact on your personal tax position.

Liability

Waystone Management (UK) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Company.

This Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority (FCA). Waystone Management (UK) Limited is authorised in the United Kingdom and regulated by the FCA.

This key investor information is accurate as at 22/05/2026.

Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Ruffer Diversified Return Fund (the "Fund"),

a fund within WS Ruffer Managed Funds
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

I Accumulation (ISIN: GB00BMWLQW82)

Objective and Investment Policy

Objective

To achieve a positive return (an increase in value of the Fund) with a focus on capital preservation in all market conditions after all costs and charges have been taken, over any 12 month period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest globally, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in the following asset classes: equities (company shares), bonds (loans to either a company or government that usually pay interest), alternative investments (property and precious metals), money market instruments (which are short term loans that pay interest) and cash. As part of the equity exposure, the Fund may invest in Investment Trusts. Investment in open-ended Funds is limited to 10% of total assets by value.

The Investment Manager seeks to create a balanced portfolio by investing in both protective assets, such as bonds, derivatives and cash, and growth assets, such as equities. The Investment Manager seeks to identify opportunities where the potential rewards outweigh the potential risks through analysis of a company's markets, product/service offering, competitive position, financial strength and competence of its management.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each business day.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used for investment purposes and to manage the risk profile of the Fund.

The Fund will not invest directly in alternative assets, but by using for example other Funds.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

Lower risk **Higher risk**

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns may have varied. It is a measure of the Fund's volatility. As the Fund has less than 5 years history, this calculation incorporates the volatility of an appropriate benchmark index.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- Currency Risk: As the Fund invests in overseas securities, movements in exchange rates, when not hedged, cause the value of your investments to increase or decrease. Currency hedging, where applied, may not fully eliminate this risk and mismatches can occur.
- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Emerging Markets Risk: The Fund may invest in emerging markets, which are markets in developing countries. These markets may be more volatile than developed markets and may have less well-developed regulatory systems and disclosure standards. Emerging markets may have more political and economic risks that may result in large and frequent price movements. There is also a higher risk of liquidity issues or counterparty defaults, which could cause a loss to the Fund.
- Change in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.
- Credit Risk: The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.
- Liquidity Risk: The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.
- Derivative Risk: The Fund may use derivatives, which can be complex instruments. A derivative may not perform as expected and can create losses greater than its initial cost. A relatively small movement in value of the underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund held the underlying investment directly.
- Alternative Investment Risk: The Fund may invest in other investment vehicles to gain indirect exposure to alternative assets. These may include, where applicable, commodities, precious metals, real estate, private equity or other illiquid strategies. Such investments can involve a higher degree of risk and may be more volatile, which could increase the risk of loss. These is also a possibility of delays in receiving redemption proceeds.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.

Charges taken from the Fund over the year	
Ongoing Charges	0.93%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 15 September 2025. This figure may vary from year to year.

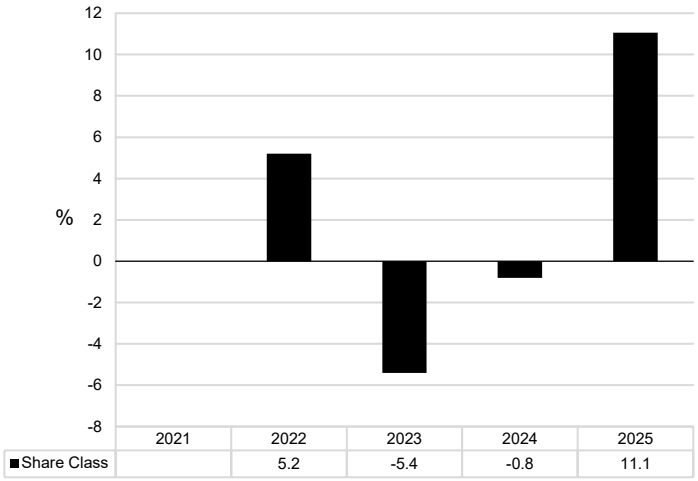

The ongoing charges are taken from the income of the Fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Where open-ended funds are a material portion of the Fund's portfolio we also include their ongoing charges in the calculation.

You may also be charged a dilution adjustment (an adjustment to cover the dealing costs incurred by the Fund) on entry to or exit from the Fund.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Fund's Prospectus, available at www.waystone.com.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 1 September 2021. This share class was launched on 1 September 2021.

Past performance is calculated in GBP.
